Assets under management (US\$bn)

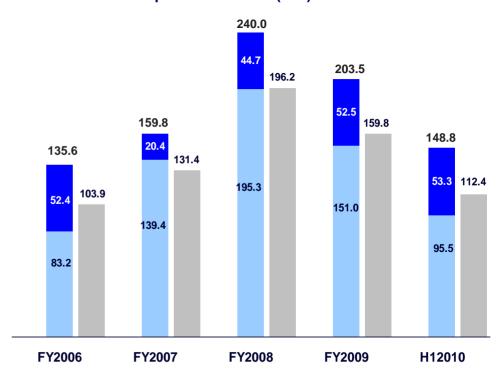

### **Overview**

### Financial summary

- Revenue and profitability development in line with AuM over recent cycle
- Performance fees strong contribution over last 3 years
- Leading industry operating margin
- Strong balance sheet

#### Net revenues and profit before tax (£'m)

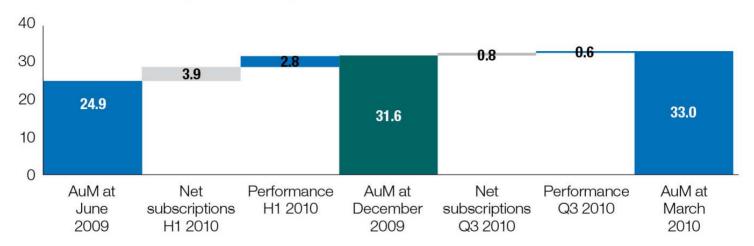

■ Management fees, FX and other income ■ Performance fees ■ Profit before tax

# Q3 interim management statement

- The quarter saw assets under management increase 4% to US\$33.0 billion
- The drivers of this were net inflows of US\$0.8 billion principally into the external debt and local currency themes, and positive performance of US\$0.6 billion.
- Trading conditions are in line with management expectations and the Group remains confident of its prospects for the current year
- The GBP:USD exchange rate has been relatively volatile over the period (31 March 1.5184 vs 31 December 1.6170), with an average rate for the quarter of GBP1:1.5428 USD

#### 2009/2010 AuM development (US\$bn)

# **Strategy**

## Ashmore's consistent three phase strategy

#### Developed world capital → EM investment

Phase 1: Establish emerging market asset class

Status: Largely completed

- Establish Ashmore emerging markets investment processes
- Enhance understanding of emerging markets debt in the developed world
- Provide access to emerging markets, and their rapid development opportunities
- Develop strong performance track record
- Increase developed world investor allocations into emerging markets

Phase II: Diversify developed world capital sources and themes

Status: Underway - significant growth available

- Establish new investment themes to diversify emerging market product offerings
- Develop new product structures and capabilities
- · Establish Ashmore as trusted allocator
- · Broaden and deepen developed world investor base
- · Deliver strong performance consistently
- Phase III: Mobilise emerging markets capital
  Status: Commenced enormous future growth opportunities
  - Mobilise emerging markets capital managed offshore:
    - Capital sourced initially from largest pools, i.e. central banks, governments, reserve managers, and sovereign wealth funds
  - Develop network of domestic asset management businesses:
    - Manage domestic capital locally
    - Create strong local performance track record

EM capital → EM investment

# Opportunity arising from uncertain economic environment Phase 2 of Ashmore strategy

- Impact of credit crisis still being felt in developed world economies whilst emerging markets are source of global growth
- Emerging markets taking much greater market share
  - 35% of global economy in GDP terms
  - 75% of world's landmass, 80% of its population
  - Emerging markets have 90% of oil and gas and 70% of coal reserves
- Developed world investors massively underweight in emerging markets
  - Typical pension fund exposures
  - EM equities 3-8%, EM Fixed income 2-5%, EM alternatives <2%</li>
  - Emerging markets represent only c10% of MSCI all country world index

# Opportunity arising from uncertain economic environment Phase 3 of Ashmore strategy

- Rebalancing of emerging market central banks and other savers towards domestic and other emerging market investment
  - Emerging markets represents around 75% of total world FX reserves
  - Reducing dependence on USD reserve management a key theme for emerging market central banks
  - Diversification into other emerging market asset classes also a trend
- Emerging market sovereign wealth funds and central bank/reserve managers are strongest AuM growth area for Ashmore in last 12 months
- Emerging market domestic asset management operations now established in Brazil, India, Turkey and Colombia

# Opportunity arising from current regulatory environment

- Independent asset managers like Ashmore will be likely beneficiaries as banks continue to divest of asset management businesses
- Ashmore's approach is long only, with a blend of levered & unlevered funds (c60% of AuM can lever, max up to 75%)
- Broad range of fund and segregated account structures in different regulatory jurisdictions
  - 8 new SICAV funds launched 26 February 2010 bringing total to 12
- Ashmore's established and embedded remuneration structure with significant equity component with full 5 year deferral is where other organisations are trending

### Ashmore

### Conclusion

- Ashmore's long term strategy sits in sweet spot given current economic environment
- Most recent interim period has shown strong financial and AuM performance
- Investment performance strong and consistent to our investment strategy
  - 98% of AuM outperforming benchmark over 12 months
- Confident in outlook for further allocation from developed and emerging market sources

...increased investor interest supports long term growth outlook

# **Update on themes**Special situations

#### Theme premise

 Investments in both distressed debt (principally for control) and / or private equity

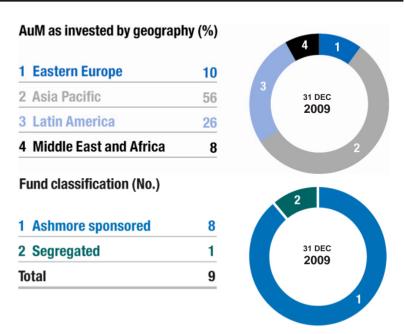

#### **Facts**

- Launched 2000
- Management fees<sup>(1)</sup> £21.2m (2008: £21.4m)
- Average mgmt fee margin: 215 bps (2008: 185 bps)
- Performance fees: £4.5m (2008: £16.2m)
- 8 public funds

#### **Current markets / opportunities**

- Unique access to private investments in emerging markets which are often complex and difficult situations
- Aim to create value through an event(s) which transform the Company, hence preference for distressed for control

...some realisations achieved but significant inherent embedded value

# **Update on themes Equity**

#### Theme premise

- Public equity and equity-related securities
- Can include equities, convertibles, warrants and equity derivatives

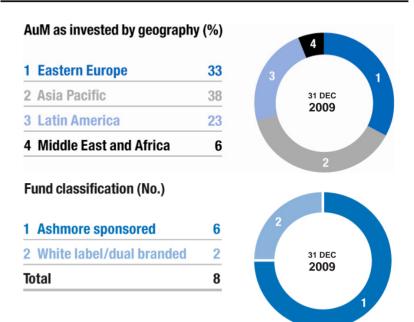

#### **Facts**

- Launched 2000
- Management fees<sup>(1)</sup> £0.8m (2008: £0.9m)
- Average mgmt fee margin: 186 bps (2008: 112 bps)
- Performance fees: £2.4m (2008: £0.1m)
- 6 public funds

#### **Current markets / opportunities**

- Attractive, potentially high, returns from growing and deepening emerging equity markets
- Index returns have seen ten year periods of negative returns, emphasising the benefit of active management of country risk

...increasing investor interest and good performance

# **Update on themes** Corporate high yield

#### Theme premise

Investments in corporate debt within emerging markets

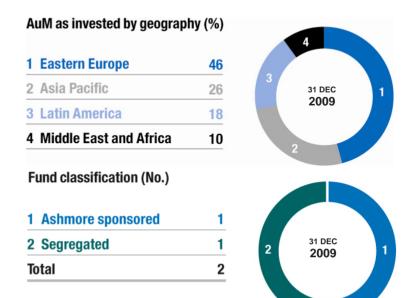

#### **Facts**

- Launched 2007
- Management fees<sup>(1)</sup> £3.4m (2008: £2.6m)
- Average mgmt fee margin: 173 bps (2008: 192 bps)
- Performance fees: £0.1m (2008: nil)
- 1 public fund

#### **Current markets / opportunities**

- Emerging markets corporate high yield is a fast growing segment of emerging debt markets
- Offers historically attractive risk-adjusted returns, and a strong alternative to G7 corporates

#### IMPORTANT INFORMATION

This document does not constitute an offer to sell or an invitation to buy shares in Ashmore Group plc or any other invitation or inducement to engage in investment activities. Certain statements, beliefs and opinions in this document are forward-looking, which reflect the Company's current expectations and projections about future events. By their nature, forward-looking statements involve a number of risks, uncertainties and assumptions that could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements.

Forward-looking statements contained in this document regarding past trends or activities should not be taken as a representation that such trends or activities will continue in the future. The value of investments, and the income from them, may go down as well as up, and is not guaranteed. Past performance cannot be relied on as a guide to future performance. Exchange rate changes may cause the value of overseas investments or investments denominated in different currencies to rise and fall. The Company does not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. You should not place undue reliance on any forward-looking statements, which speak only as of the date of this document
