Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Funds' prospectus. Please read the prospectus carefully before you invest or send money.

A Fund's past performance is not necessarily an indication of how the Fund will perform in the future.

An investment in a Fund is not a deposit of a bank and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money on investments in the Funds.

ASHMORE FUNDS INVESTMENT MANAGERS REPORT

For the period November 1, 2012 to April 30, 2013

Overview

During the six months ending April 30, 2013, investors were treated to a fairly benign global risk event environment which permitted a return of risk appetite. The re-election of President Obama removed one significant potential risk event and the dreaded “Fiscal Cliff” ended up as we expected it would: With neither the Republicans nor Democrats able to agree on any longer-term solution, the issue was effectively punted into the future. The volatility around the Fiscal Cliff deadline did provide some good entry points for longer-term investors; price movements were generally behaviorally-driven and had little connection to underlying issuer/company fundamentals.

In the absence of any material negative events, developed markets, flush with Central Bank sourced liquidity, saw asset prices pushing higher. While it is true that there were signs of recovering growth in the United States, our view remained that equity prices were too far beyond fundamentals and future earnings potential. Market sentiment was enforced when the European Central Bank lowered its already insignificant policy interest rate from 0.75% to 0.50% and indicated that it would do all that was necessary to support and promote growth. At the same time, we saw Japan effectively call the bluff of its G7 partners, by announcing a massive yen devaluation program to jump-start their crippled economy. Those who sought “safety” in the yen woke up to material losses relative to other G7 currencies. Japanese equities rallied on the basis that a strongly lower yen would make their exports more attractive and thus improve both company and domestic economic performance. The danger is that if this strategy appears to work, there will be little political will amongst other anaemically growing developed markets not to follow Japan’s example and we may see the start of a currency war among developed markets to devalue their currencies in order to boost growth. This would clearly impact the emerging markets (“EM”) and in particular EM currencies. It is a scenario that we believe will ultimately take place; indeed we are already seeing it start to unfold.

The lure of strong domestic Developed markets created some technical outflows from EM asset classes, principally in hard currency sovereign debt. The need to look outside of ones country to find more attractive returns was replaced by higher Developed Market equity prices. We expect this technical trade to reverse in due course, as a dip in the market should force investors to refocus on fundamentals as opposed to momentum investment.

There were however bright spots across EM asset classes during the reporting period, with corporate debt for example performing relatively well. Investor focus appeared to be on credit-specifics and cash flows which was an encouraging development. We see EM Corporate Debt as providing attractive exposure to investors both through access to credit across the ratings spectrum in diversified industries and through the benefit of the favourable longer-term macro dynamics of EM countries, such as higher growth, a growing middle class, increasing disposable income and a proliferation of new pension programs.

We expect 2013 to be a year of two halves, with the first half being muted due to lower global growth and the second half providing greater alpha opportunities as growth picks up. We believe the medium to longer-term outlook for the Emerging Markets remains strong: EM capital markets continue to mature and offer investors varied sources of both return and investment exposure to fit their portfolios. We have seen strong demand across investor types for EM investments, and given the large (and growing) proportion of global economic activity that the Emerging Markets represent, there is little reason to believe that this trend will stop.

Portfolio Overview

Ashmore Emerging Markets Corporate Debt Fund

The Ashmore Emerging Markets Corporate Debt Fund (“the Fund” or “USCDF”) seeks to achieve its objective by investing principally in the debt instruments of corporate issuers, which may be denominated in any currency, including the local currency of the issuer. EM corporates operate in an environment that typically consists of higher growth and maturing capital markets. Increased “south/south” trade (i.e. trade between EM countries as opposed to trade with developed markets) represents a material structural change for EM corporates and has helped them to broaden their customer base. In most cases, EM corporates are characterized by new and growing

ASHMORE FUNDS INVESTMENT MANAGERS REPORT (CONTINUED)

businesses in industries such as mobile communications, technology and food production. These are the industries we expect to reap larger rewards from the developing economies in which they operate. Ashmore continues to focus its efforts on companies that may attract less attention from market participants and thus allow us to add maximum value based on our views, research and global network capabilities in the EM. For example, this strategy will often include positions that do not feature in indices, which can have restrictions based on issuer-currency, size of issue or maturity. Our deep research capabilities and knowledge of the investment universe allows us to access a much broader opportunity set that can improve not only alpha, but liquidity and diversification.

Over the reporting period, the Fund continued to produce attractive returns: The USCDF portfolio rose 4.97% in the six months ended April 30, 2013, compared to the JP Morgan CEMBI BD benchmark return of 3.59%. Issuer selection was a key driver of performance: With continued strong issuance across the EM corporate debt space, the Ashmore Investment Team was selective in its primary purchases and focused on its core strengths to drive alpha, namely credit analysis complimented by a robust global macro overlay. We remain highly constructive on the outlook for EM corporate debt which is the fastest growing part of the EM debt universe.

Ashmore Emerging Markets Local Currency Bond Fund

The Ashmore Emerging Markets Local Currency Bond Fund (“the Fund” or “USLCBF”) seeks to achieve its objective by investing principally in the debt instruments of the sovereign and quasi-sovereign issuers of EM Countries, denominated in the local currency of the issuer. Returns for the Fund are driven by EM currency appreciation, interest rate positioning and credit worthiness.

Performance for the Fund in the six month reporting period was strong, with net returns of 8.00% compared to the JP Morgan GBI EM GD benchmark return of 7.02%. Low growth, benign inflation and a softer 2013 outlook all helped to push local currency bond returns higher. While EM currencies themselves did not contribute materially to performance, there were strong gains from the credit side. The outlook for this asset class remains positive, with global growth currently at the lower end of 2013 full-year estimates. Central Banks have generally shown a willingness to adopt a more accommodating stance where possible, such as in Poland and Mexico, where 0.50% rate cuts were seen in the first quarter of 2013.

Ashmore Emerging Markets Local Currency Fund

The Ashmore Emerging Markets Local Currency Fund (“the Fund” or “USLCF”) seeks to provide investment exposure to the local currencies of EM countries, principally by investing in derivatives and other instruments that mature in under a year (“short-dated instruments”). The Fund also has the flexibility to invest in longer-dated derivative instruments or debt instruments of any maturity from sovereign or quasi-sovereign issuers, denominated in the local currency of the issuer.

Gains in the reporting period were moderate, with the Fund outperforming its JP Morgan ELMI+ benchmark by approximately 0.55%. EM currencies generally traded higher, although the pace of their appreciation waned in the stronger US dollar environment. With EM Central Banks principally focused on supporting their local economies, the broad view was that there was reduced pressure for EM currencies to trade higher. On a country-by-country basis, there were material differences in performance: The Mexican peso demonstrated strong resilience by rising despite a cut in Mexican rates; the Brazilian real was volatile and despite the clear presence of upward pressure, the currency remained artificially low due to government intervention aimed at protecting exporters; Chinese renminbi grinded downwards over the six month period, hitting a one-year low. The outlook for EM local currencies is positive although a clear understanding of country dynamics and growth will be a key to alpha generation in this theme until global growth picks up.

Ashmore Emerging Markets Sovereign Debt Fund

The Ashmore Emerging Markets Sovereign Debt Fund (“the Fund” or “USSDF”) seeks to achieve its objective by investing principally in the debt instruments of the sovereign and quasi-sovereign issuers of EM countries, denominated in any hard currency. Historically, EM sovereign debt has typically been the most developed, most stable, and least risky of the EM fixed income asset classes.

The performance of this theme, while positive for the reporting period, was disappointing. The 2.2% net return provided investors with a positive result to the end of April, but returns were hurt by performance in the first

ASHMORE FUNDS INVESTMENT MANAGERS REPORT (CONTINUED)

three months of 2013. Materially higher prices for both equities and other higher yielding assets in the Developed markets drew back cross-over capital which had previously sought the relative safety and higher yields of hard currency EM sovereign debt. The resulting performance of the USSDF portfolio, and the EM hard currency asset class in general, did not reflect a change in fundamentals, but rather a change in investor behaviour and preference. Typically with cross-over investments, the move is not strategic or longer-term in nature. While the volatility that these movements create offers 'real money' investors like Ashmore good buying opportunities, it can result in lower returns over the short term.

Our view is that the expected gradual increase in US Treasury rates is unlikely to have a material impact on EM hard currency in the near term. We believe a spike in US Treasury rates could threaten the fragile US recovery and we do not see the US Fed allowing this to happen: A slow and steady rate of yield appreciation is the more likely scenario and in this case, EM hard currency bonds should be able to absorb any technical price movements and still offer good value from a credit perspective.

Ashmore Emerging Markets Total Return Fund

The Ashmore Emerging Markets Total Return Fund ("the Fund" or "USTRF") seeks to achieve its objective by investing principally in the debt instruments of sovereign, quasi-Sovereign, and corporate issuers, which may be denominated in any currency, including the local currency of the issuer. The Fund tactically allocates assets between the external debt, corporate debt and local currency debt themes.

Investors in the Fund benefitted from its ability to dynamically allocate among the three main EM debt investment themes. The overall return for the period was 5.10% compared to a benchmark¹ return of 3.6%. Overweight allocations to corporate debt and local currency debt helped to support and drive alpha. The corporate debt theme continues to provide the Fund with attractive credit opportunities, offering both higher yields and potential credit improvements. The local currency bond allocation performed well in the accommodative lower growth monetary policy environment. Allocations to hard currency involved the tactical selection of countries like Ukraine and Venezuela. In the case of the former, the Fund targeted steady improvements on the fiscal side ahead of a likely IMF deal, and for the latter, the Fund's allocation was based on the potential for both structural reforms and changes in the political landscape that may encourage both the return of foreign investment and an improvement in the management of domestic finances.

Ashmore Emerging Markets Equity Fund

The Ashmore Emerging Markets Equity Fund seeks to achieve its objective by investing principally in equity securities and equity-related investments of EM issuers, which may be denominated in any currency, including the local currency of the issuer.

Emerging Market equities ended the period on a positive note, up 5.3% (MSCI EM Index, net), led by strong returns in markets such as the Philippines (+31.9%), Thailand (+22.3%), Turkey (+18.3%), Indonesia (+13.6%) and Taiwan (+12.3%). Markets such as Egypt (-18.0%), Czech Republic (-16.8%), Peru (-7.8%) and Hungary (-5.4%), however, came under pressure. The portfolio outperformed the MSCI EM index for the 6 month period ending April 30, 2013. Country allocation and stock selection both added value to relative performance. The portfolio's underweight in South Africa and Malaysia added most to allocation, with the overweight to South Korea detracting the most. Stock selection in Brazil (energy and consumer discretionary plays) and Turkey (industrials and financials) were beneficial, while selection in South Korea (consumer discretionary and industrials) and Taiwan (financials) lagged.

Many investors have allocated to what they believe are "safe haven" companies since the 2008 financial crisis. We believe the result is a "safety bubble" where stocks viewed as having more predictable earnings streams and higher dividend yields carry very high valuations that are unlikely to be sustainable over time. In sharp contrast, we believe larger markets that have more global exposure and/or have experienced domestic challenges are priced near historical lows offering serious opportunities for longer term appreciation as the concerns on government policy/leadership transitions and macro variables, including growth, inflation, and interest rates, begin to wane.

¹ Benchmark consists of 50% JP Morgan EMBI GD, 25% JP Morgan ELM+ and 25% JP Morgan GBI-EM GD

ASHMORE FUNDS INVESTMENT MANAGERS REPORT (CONTINUED)

As a result, the Fund maintains an overweight position in China, Brazil, South Korea and Russia on the back of attractive valuations and superior earnings prospects. All four markets continue to offer compelling valuations, trading at 9.2x, 11.1x, 8.3x and 4.8x consensus price to 2013 earnings estimates, respectively, below the MSCI EM Index average of 11.7x. Overall we continue to seek companies trading at a discount to long-term fundamental value. The portfolio positioning favors value markets and stocks that we believe will benefit most as we move into a more positive macro environment. As a result of our value-oriented stock selection approach, we are also finding compelling opportunities in the more cyclical areas of the market, and as such have an overweight exposure to consumer discretionary and maintain our underweight exposure to the more expensive consumer staples sector.

Ashmore Emerging Markets Small-Cap Equity Fund

The Ashmore Emerging Markets Small-Cap Equity Fund seeks to achieve its objective by investing principally in equity securities and equity-related investments of small-capitalization emerging market issuers, which may be denominated in any currency, including the local currency of the issuer.

Emerging Markets small cap equities ended the period on a strong note, up 13.4% (MSCI EM Small Cap Index, net), led by impressive returns in markets such as Thailand (+45.7%), the Philippines (+32.4%), Turkey (+25.1%) and Indonesia (+22.9%). Markets such as Colombia (-53.7%), Peru (-22.7%), Egypt (-17.0%) and Morocco (-12.0%) declined. The portfolio lagged the MSCI EM Small Capitalisation index return for the 6 month period ending April 30, 2013. Country allocation added value, but was offset by stock selection which detracted, particularly in Taiwan (led by information technology), Mexico (consumer discretionary) and China (financials). China has lagged other EM markets more broadly as a result of domestic and political uncertainty surrounding the Chinese Congress elections. As policy issues become clearer, we expect the market to rebound; we believe Chinese stocks are fundamentally undervalued as corporate fundamentals have remained generally robust through this period of uncertainty. Stock picks in Brazil (financials), Peru (industrials) and Thailand (industrials) were beneficial.

The portfolio's relative performance is also attributed to our adherence to an investment discipline driven by valuation in a market environment that has continued to reward expensive consumer staples at valuation levels we deem unsustainable.

Driven by long-term fundamental value, quality and growth, we have a portfolio of companies that we believe should benefit from a domestic and global environment of low inflation and low interest rates, a pick-up in growth albeit moderate, and high risk premiums that will moderate in such an environment. Should the macro environment be supportive, based on our views, we believe the portfolio contains positions that are quite attractive from a valuation perspective, compared to the MSCI EM index, with internal figures showing Fund positions trading near a 30% discount to the index on a forward price-to-earnings basis. (Sources: Ashmore estimates and MSCI).

IMPORTANT INFORMATION ABOUT THE FUNDS

Ashmore Investment Management Limited

This commentary may include statements that constitute “forward-looking statements” under the U.S. securities laws. Forward-looking statements include, among other things, projections, estimates, and information about possible or future results related to the Funds and market or regulatory developments. The views expressed above are not guarantees of future performance or economic results and involve certain risks, uncertainties and assumptions that could cause actual outcomes and results to differ materially from the views expressed herein. The views expressed above are those of Ashmore Investment Management Limited as of the date indicated and are subject to change at any time based upon economic, market, or other conditions and Ashmore Investment Management Limited undertakes no obligation to update the views expressed herein. Any discussions of specific securities or markets should not be considered a recommendation to buy or sell or invest in those securities or markets. The views expressed above may not be relied upon as investment advice or as an indication of the Funds' trading intent. Information about the Funds' holdings, asset allocation or country diversification is historical and is not an indication of future portfolio composition, which may vary. Direct investment in any index is not possible. The performance of any index mentioned in this commentary has not been adjusted for ongoing management, distribution and operating expenses applicable to mutual fund investments. In addition, the returns do not reflect certain charges that an investor in the Funds may pay. If these additional fees were reflected, the performance shown would have been lower.

The following disclosure provides important information regarding each Fund's Average Annual Total Return table and Cumulative Returns chart, which appear on each Fund's individual page in this report (the “Shareholder Report” or “Report”). Please refer to this information when reviewing the table and chart for a Fund.

On each individual Fund Summary page in this Report, the Average Annual Total Return table and Cumulative Returns chart measure performance assuming that all dividend and capital gain distributions were reinvested. Returns do not reflect the deduction of taxes that a shareholder would pay on (i) Fund distributions or (ii) the redemption of Fund shares. The Cumulative Returns Chart reflects only Institutional Class performance. Performance for Class A and Class C shares is typically lower than Institutional Class performance due to the lower expenses paid by Institutional Class shares. Except for the load-waived performance for the Class A and C shares of each Fund (as applicable), performance shown is net of fees and expenses. The load-waived performance for Class A and Class C shares does not reflect the sales charges shareholders of those classes may pay in connection with a purchase or redemption of Class A and Class C shares. The load-waived performance of those share classes is relevant only to shareholders who purchased Class A or Class C shares on a load-waived basis. The figures in the line graph are calculated at net asset value and assume the investment of \$1,000,000 at the beginning of the first full month following the inception of the Institutional Class. Each Fund measures its performance against a broad-based securities market index (“benchmark index”). Each benchmark index does not take into account fees, expenses or taxes.

For periods prior to the inception date of the Class A and Class C shares (if applicable), performance information shown is based on the performance of the Fund's Institutional Class shares, adjusted to reflect the distribution and/or service fees and other expenses paid by the Class A and Class C shares, respectively.

A Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future.

An investment in a Fund is not a deposit of a bank and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money on investments in the Funds.

IMPORTANT INFORMATION ABOUT THE FUNDS (CONTINUED)

The following disclosure provides important information regarding each Fund's Expense Example, which appears on each Fund's individual page in this Shareholder Report. Please refer to this information when reviewing the Expense Example for a Fund.

EXPENSE EXAMPLE

Fund Expenses

As a shareholder of the Funds, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments; redemption fees; and exchange fees; and (2) ongoing costs, including management fees; distribution (12b-1) fees; and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Funds and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period, from November 1, 2012 or the inception date (if later), through April 30, 2013.

Actual Expenses

The information in the table under the heading "Actual Performance" provides information based on actual performance and actual expenses. You may use the information in these columns, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = \$8.60), then multiply the result by the number in the appropriate column for your share class, in the row titled "Expenses Paid" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The information in the table under the heading "Hypothetical Performance" provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the information under the heading "Hypothetical Performance" is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

Ashmore Emerging Markets Corporate Debt Fund

Ashmore Emerging Markets Corporate Debt Fund is an open-end U.S. mutual fund. The Fund seeks to achieve its objective by investing principally in debt instruments of corporate issuers, which may be denominated in any currency, including the local currency of the issuer.

Please refer to page 6 herein for an explanation of the information presented below in the Average Annual Total Return Table and Cumulative Return Chart.

[†] Expenses are equal to the Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one-half year period). Hypothetical expenses are based on the Fund's actual annualized expense ratios and assumed rate of 5 percent per year before expenses.

Ashmore Emerging Markets Currency Fund*

Ashmore Emerging Markets Currency Fund is an open-end U.S. mutual fund. The Fund seeks to achieve its objective by investing principally in derivatives and other instruments that mature in less than one year ("short-dated instruments") and provide investment exposure to local currencies of Emerging Market countries. The Fund also has the flexibility to invest in longer-dated derivative instruments. The Fund may also invest in debt instruments of any maturity issued by sovereigns and quasi-sovereigns and denominated in the local currency of the issuer. *Effective 2/28/2013, the name of the Fund changed from Ashmore Emerging Markets Local Currency Fund to Ashmore Emerging Markets Currency Fund.

Please refer to page 6 herein for an explanation of the information presented below in the Average Annual Total Return Table and Cumulative Return Chart.

¹ Class A commenced investment operations on February 27, 2012.

² Class C commenced investment operations on August 24, 2012.

³ Per share amounts are based on average number of shares outstanding during the period.

⁴ Amount is less than \$0.005 per share.

⁵ Assumes investment at net asset value at the beginning of the period, reinvestment of all distributions at net asset value on distribution date, and a complete redemption of the investment at net asset value at the end of the period excluding the impact of sales charges. Total return is not annualized for periods less than one year.

⁶ The portfolio turnover rate is calculated by dividing the lesser of cost of purchases or proceeds from sales of long term portfolio securities by the monthly average of the value of the long term portfolio securities. Portfolio turnover is not annualized for periods less than one year.

⁷ Annualized for periods less than one year.

⁸ The Institutional Class commenced investment operations on June 22, 2011.

See accompanying notes to the financial statements.

The inputs or methodologies used for valuing securities are not necessarily an indication of the risks associated with investing in those securities and other financial instruments, if any. See note 4 in the Notes to the Financial Statements for more information regarding pricing inputs and valuation techniques. The following is a summary of the inputs used in valuing the Ashmore Emerging Markets Corporate Debt Fund's investments and other financial instruments, which are carried at fair value, as of April 30, 2013:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Investments				
Assets:				
Common Stock	\$ —	\$ 30,639	\$ —	\$ 30,639

Corporate Convertible Bonds	—	948,479	—	948,479
Government Bonds	—	122,500	—	122,500
Financial Certificates	—	2,262,011	—	2,262,011
Index Linked Corporate Bonds	—	363,509	—	363,509
Warrants	—	7,104	—	7,104
Total Investments	\$ —	\$73,650,984	\$ —	\$73,650,984
Other Financial Instruments				
Assets:				
Forward Foreign Currency Exchange Contracts	\$ —	\$ 11,329	\$ —	\$ 11,329
Liabilities:				
Forward Foreign Currency Exchange Contracts	—	(104,548)	—	(104,548)
Total Other Financial Instruments	\$ —	\$ (93,219)	\$ —	\$ (93,219)

The Fund discloses all transfers between levels based on valuations at the end of each reporting period. At April 30, 2013 there were no transfers between Level 1, Level 2 and Level 3 based on levels assigned to the securities on October 31, 2012. U.S. GAAP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate when a transaction is not orderly.

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS CORPORATE DEBT FUND**SCHEDULE OF INVESTMENTS (CONTINUED)***As of April 30, 2013 (Unaudited)*

The following is a summary of the fair values of the Fund's derivative instruments*:

Fair Values of Financial Derivative Instruments on the Statements of Assets and Liabilities as of April 30, 2013:

	<u>Derivatives Not Accounted for as Hedging Instruments</u>
Assets:	
Unrealized Appreciation on Forward Foreign Currency Exchange Contracts	\$ 11,329
Liabilities:	
Unrealized Depreciation on Forward Foreign Currency Exchange Contracts	\$ (104,548)

The Effect of Financial Derivative Instruments on the Statements of Operations for the Six Month Period Ended April 30, 2013:

	<u>Derivatives Not Accounted for as Hedging Instruments Foreign Exchange</u>
Realized Gain on Derivatives Recognized resulting from Operations:	
Net Realized Gain on Forward Foreign Currency Exchange Contracts	\$ 119,941
Net Change in Unrealized Depreciation on Derivatives Recognized resulting from Operations:	
Net Change in Unrealized Depreciation on Forward Foreign Currency Exchange Contracts	\$ (87,144)

* See note 9 in the Notes to the Financial Statements for additional information.

At April 30, 2013, for U.S. federal income tax purposes, gross unrealized appreciation, gross unrealized depreciation, net unrealized appreciation/(depreciation) on investments in securities (including the effects of foreign currency translation) and the cost basis of investments were as follows:

Federal tax cost of investments	\$73,380,398
Gross tax appreciation of investments	\$1,703,131
Gross tax depreciation of investments	(1,432,545)
Net tax appreciation of investments	\$270,586

The difference between book basis and tax basis net unrealized appreciation or depreciation is attributable primarily to the tax deferral of losses on wash sales.

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS LOCAL CURRENCY BOND FUND

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risks associated with investing in those securities and other financial instruments, if any. See note 4 in the Notes to the Financial Statements for more information regarding pricing inputs and valuation techniques. The following is a summary of the inputs used in valuing the Ashmore Emerging Markets Local Currency Bond Fund's investments and other financial instruments, which are carried at fair value, as of April 30, 2013:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Investments				
Assets:				
Government Bonds	\$—	\$56,966,416	\$—	\$56,966,416
Index Linked Government Bonds	—	12,895,035	—	12,895,035
Fully Funded Total Return Swaps	—	8,772,085	—	8,772,085
Purchased Options	—	93,573	—	93,573
Total Investments	\$—	\$78,727,109	\$—	\$78,727,109
Other Financial Instruments				
Assets:				
Forward Foreign Currency Exchange Contracts	\$—	\$ 995,834	\$—	\$ 995,834
Interest Rate Swap Contracts	—	577,590	—	577,590
Liabilities:				
Forward Foreign Currency Exchange Contracts	—	(671,065)	—	(671,065)
Interest Rate Swap Contracts	—	(29,403)	—	(29,403)
Total Other Financial Instruments	\$—	\$ 872,956	\$—	\$ 872,956

The Fund discloses all transfers between levels based on valuations at the end of each reporting period. At April 30, 2013, there were no transfers between Level 1, Level 2 and Level 3 based on levels assigned to the securities on October 31, 2012. U.S. GAAP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate when a transaction is not orderly.

The following is a summary of the fair values of the Fund's derivative instruments*:

Fair Values of Financial Derivative Instruments on the Statements of Assets and Liabilities as of April 30, 2013:

	<u>Derivatives Not Accounted for as Hedging Instruments</u>	
	<u>Foreign Exchange</u>	<u>Fixed Income/ Interest Rate</u>
Assets:		
Unrealized Appreciation on Interest Rate Swap Contracts	\$ —	\$ 577,590
Unrealized Appreciation on Forward Foreign Currency Exchange Contracts	995,834	—
	<u>\$ 995,834</u>	<u>\$ 577,590</u>
Liabilities:		
Unrealized Depreciation on Interest Rate Swap Contracts	\$ —	\$ (29,403)
Unrealized Depreciation on Forward Foreign Currency Exchange Contracts	(671,065)	—
	<u>\$ (671,065)</u>	<u>\$ (29,403)</u>

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS LOCAL CURRENCY BOND FUND

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

The Effect of Financial Derivative Instruments on the Statements of Operations for the Six Month Period Ended April 30, 2013:

	Derivatives Not Accounted for as Hedging Instruments	
	Foreign Exchange	Fixed Income/ Interest Rate
Realized Gain on Derivatives Recognized resulting from Operations:		
Net Realized Gain on Forward Foreign Currency Exchange Contracts	\$ 1,004,521	\$ —
Net Realized Gain on Interest Rate Swap Contracts	—	226,762
	<u>\$ 1,004,521</u>	<u>\$ 226,762</u>
Net Change in Unrealized Appreciation on Derivatives Recognized resulting from Operations:		
Net Change in Unrealized Appreciation on Forward Foreign Currency Exchange Contracts	\$ 114,674	\$ —
Net Change in Unrealized Appreciation on Interest Rate Swap Contracts	—	233,064
	<u>\$ 114,674</u>	<u>\$ 233,064</u>

* See note 9 in the Notes to the Financial Statements for additional information.

At April 30, 2013, for U.S. federal income tax purposes, gross unrealized appreciation, gross unrealized depreciation, net unrealized appreciation/(depreciation) on investments in securities (including the effects of foreign currency translation) and the cost basis of investments were as follows:

Federal tax cost of investments	\$75,465,954
Gross tax appreciation of investments	\$3,854,610
Gross tax depreciation of investments	(593,455)
Net tax appreciation of investments	<u>\$3,261,155</u>

The difference between book basis and tax basis net unrealized appreciation or depreciation is attributable primarily to the tax deferral of losses on wash sales.

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS CURRENCY FUND^(A)

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risks associated with investing in those securities and other financial instruments, if any. See note 4 in the Notes to the Financial Statements for more information regarding pricing inputs and valuation techniques. The following is a summary of the inputs used in valuing the Ashmore Emerging Markets Currency Fund's investments and other financial instruments, which are carried at fair value, as of April 30, 2013:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Investments				
Assets:				
Corporate Bonds	\$—	\$ 504,270	\$—	\$ 504,270
Government Bonds	—	10,234,315	—	10,234,315
Short-Term Investments	—	35,999,285	—	35,999,285
Purchased Options	—	56,211	—	56,211
Total Investments	\$—	\$46,794,081	\$—	\$46,794,081
Other Financial Instruments				
Assets:				
Forward Foreign Currency Exchange Contracts	\$—	\$ 1,142,012	\$—	\$ 1,142,012
Liabilities:				
Forward Foreign Currency Exchange Contracts	—	(632,916)	—	(632,916)
Total Other Financial Instruments	\$—	\$ 509,096	\$—	\$ 509,096

The Fund discloses all transfers between levels based on valuations at the end of each reporting period. At April 30, 2013 there were no transfers between Level 1, Level 2 and Level 3 based on levels assigned to the securities on October 31, 2012. U.S. GAAP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate when a transaction is not orderly.

The following is a summary of the fair values of the Fund's derivative instruments*:

Fair Values of Financial Derivative Instruments on the Statements of Assets and Liabilities as of April 30, 2013:

	<u>Derivatives Not Accounted for as Hedging Instruments</u>
	<u>Foreign Exchange</u>
Assets:	
Unrealized Appreciation on Forward Foreign Currency Exchange Contracts	<u>\$1,142,012</u>
Liabilities:	
Unrealized Depreciation on Forward Foreign Currency Exchange Contracts	<u>\$ (632,916)</u>

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS CURRENCY FUND^(A)

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

The Effect of Financial Derivative Instruments on the Statements of Operations for the Six Month Period Ended April 30, 2013:

	<u>Derivatives Not Accounted for as Hedging Instruments</u>
	<u>Foreign Exchange</u>
Realized Gain on Derivatives Recognized resulting from Operations:	
Net Realized Gain on Forward Foreign Currency Exchange Contracts	<u>\$1,229,141</u>
Net Change in Unrealized Appreciation on Derivatives Recognized resulting from Operations:	
Net Change in Unrealized Appreciation on Forward Foreign Currency Exchange Contracts	<u>\$ 145,817</u>

* See note 9 in the Notes to the Financial Statements for additional information.

At April 30, 2013, for U.S. federal income tax purposes, gross unrealized appreciation, gross unrealized depreciation, net unrealized appreciation/(depreciation) on investments in securities (including the effects of foreign currency translation) and the cost basis of investments were as follows:

Federal tax cost of investments	<u>\$46,461,492</u>
Gross tax appreciation of investments	\$361,606
Gross tax depreciation of investments	<u>(29,017)</u>
Net tax appreciation of investments	<u>\$332,589</u>

The difference between book basis and tax basis net unrealized appreciation or depreciation is attributable primarily to the tax deferral of losses on wash sales.

^(A)Formerly the Ashmore Emerging Markets Local Currency Fund. See Note 1 to the Financial Statements.

ASHMORE EMERGING MARKETS SOVEREIGN DEBT FUND

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risks associated with investing in those securities and other financial instruments, if any. See note 4 in the Notes to the Financial Statements for more information regarding pricing inputs and valuation techniques. The following is a summary of the inputs used in valuing the Ashmore Emerging Markets Sovereign Debt Fund's investments and other financial instruments, which are carried at fair value, as of April 30, 2013:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Investments				
Assets:				
Corporate Bonds	\$—	\$ 7,046,922	\$—	\$ 7,046,922
Government Agencies	—	620,750	—	620,750
Government Bonds	—	29,417,220	—	29,417,220
Financial Certificates	—	283,616	—	283,616
Total Investments	\$—	\$37,368,508	\$—	\$37,368,508

The Fund discloses all transfers between levels based on valuations at the end of each reporting period. At April 30, 2013, there were no transfers between Level 1, Level 2 and Level 3 based on levels assigned to the securities on October 31, 2012. U.S. GAAP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate when a transaction is not orderly.

The following is a summary of the fair values of the Fund's derivative instruments*:

The Effect of Financial Derivative Instruments on the Statements of Operations for the Six Month Period Ended April 30, 2013:

	<u>Derivatives Not Accounted for as Hedging Instruments</u>
	<u>Foreign Exchange</u>
Realized Gain on Derivatives Recognized resulting from Operations:	
Net Realized Gain on Forward Foreign Currency Exchange Contracts	\$ 861

* See note 9 in the Notes to the Financial Statements for additional information.

At April 30, 2013, for U.S. federal income tax purposes, gross unrealized appreciation, gross unrealized depreciation, net unrealized appreciation/(depreciation) on investments in securities (including the effects of foreign currency translation) and the cost basis of investments were as follows:

Federal tax cost of investments	\$35,153,249
Gross tax appreciation of investments	\$2,487,489
Gross tax depreciation of investments	(272,230)
Net tax appreciation of investments	\$2,215,259

The difference between book basis and tax basis net unrealized appreciation or depreciation is attributable primarily to the tax deferral of losses on wash sales.

See accompanying notes to the financial statements.

Singapore Offer Rate Fixing 6 Month	1.800%	SGD 2,780,000	10/25/2032	(48,714)	Barclays Capital
2.600%	Singapore Offer Rate Fixing 6 Month	SGD 1,560,000	10/25/2032	<u>42,909</u>	Barclays Capital
				<u><u>\$19,508</u></u>	

The inputs or methodologies used for valuing securities are not necessarily an indication of the risks associated with investing in those securities and other financial instruments, if any. See note 4 in the Notes to the Financial Statements for more information regarding pricing inputs and valuation techniques. The following is a summary of the inputs used in valuing the Ashmore Emerging Markets Total Return Fund's investments and other financial instruments, which are carried at fair value, as of April 30, 2013:

	Level 1	Level 2	Level 3	Total
Investments				
Assets:				
Common Stock	\$ —	\$ 125,347	\$ —	\$ 125,347
Corporate Bonds	—	215,586,441	—	215,586,441
Financial Certificates	—	4,518,901	—	4,518,901
Fully Funded Total Return Swaps	—	18,277,050	—	18,277,050
Government Agencies	—	2,895,322	—	2,895,322
Government Bonds	—	242,270,805	—	242,270,805
Index Linked Corporate Bonds	—	5,574,162	—	5,574,162
Index Linked Government Bonds	—	27,973,507	—	27,973,507
Municipal/Provincial Bonds	—	3,338,300	—	3,338,300
Purchased Options	—	265,871	—	265,871
Short-Term Investments	—	30,000,000	—	30,000,000
Warrants	—	49,730	—	49,730
Total Investments	\$ —	\$550,875,436	\$ —	\$550,875,436
Other Financial Instruments				
Assets:				
Forward Foreign Currency Exchange Contracts	\$ —	\$ 4,447,611	\$ —	\$ 4,447,611
Interest Rate Swap Contracts	—	86,965	—	86,965

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS TOTAL RETURN FUND

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Liabilities:				
Forward Foreign Currency Exchange Contracts	\$ —	\$ (3,646,202)	\$ —	\$ (3,646,202)
Interest Rate Swap Contracts	—	(67,457)	—	(67,457)
Total Other Financial Instruments	\$ —	\$ 820,917	\$ —	\$ 820,917

The Fund discloses all transfers between levels based on valuations at the end of each reporting period. At April 30, 2013, there were no transfers between Level 1, Level 2 and Level 3 based on levels assigned to the securities on October 31, 2012. U.S. GAAP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate when a transaction is not orderly.

The following is a summary of the fair values of the Fund's derivative instruments*:

Fair Values of Financial Derivative Instruments on the Statements of Assets and Liabilities as of April 30, 2013:

	<u>Derivatives Not Accounted for as Hedging Instruments</u>	
	<u>Foreign Exchange</u>	<u>Fixed Income/ Interest Rate</u>
Assets:		
Unrealized Appreciation on Interest Rate Swap Contracts	\$ —	\$ 86,965
Unrealized Appreciation on Purchased Options	—	265,871
Unrealized Appreciation on Forward Foreign Currency Exchange Contracts	4,447,611	—
	<u>\$ 4,447,611</u>	<u>\$ 352,836</u>
Liabilities:		
Unrealized Depreciation on Interest Rate Swap Contracts	\$ —	\$ (67,457)
Unrealized Depreciation on Forward Foreign Currency Exchange Contracts	(3,646,202)	—
	<u>\$ (3,646,202)</u>	<u>\$ (67,457)</u>

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS TOTAL RETURN FUND

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

The Effect of Financial Derivative Instruments on the Statements of Operations for the Six Month Period Ended April 30, 2013:

	Derivatives Not Accounted for as Hedging Instruments	
	Foreign Exchange	Fixed Income/ Interest Rate
Realized Gain on Derivatives Recognized resulting from Operations:		
Net Realized Gain on Forward Foreign Currency Exchange Contracts	\$ 4,561,652	\$ —
Net Realized Gain on Interest Rate Swap Contracts	—	590,572
	<u>\$ 4,561,652</u>	<u>\$ 590,572</u>
Net Change in Unrealized Depreciation on Derivatives Recognized resulting from Operations:		
Net Change in Unrealized Depreciation on Forward Foreign Currency Exchange Contracts	\$ (181,590)	\$ —
Net Change in Unrealized Depreciation on Interest Rate Swap Contracts	—	(796,499)
	<u>\$ (181,590)</u>	<u>\$ (796,499)</u>

* See note 9 in the Notes to the Financial Statements for additional information.

At April 30, 2013, for U.S. federal income tax purposes, gross unrealized appreciation, gross unrealized depreciation, net unrealized appreciation/(depreciation) on investments in securities (including the effects of foreign currency translation) and the cost basis of investments were as follows:

Federal tax cost of investments	\$537,986,269
Gross tax appreciation of investments	\$20,267,547
Gross tax depreciation of investments	(7,378,380)
Net tax appreciation of investments	<u>\$12,889,167</u>

The difference between book basis and tax basis net unrealized appreciation or depreciation is attributable primarily to the tax deferral of losses on wash sales.

See accompanying notes to the financial statements.

The Fund discloses all transfers between levels based on valuations at the end of each reporting period. At April 30, 2013, there were no transfers between Level 1, Level 2 or Level 3 based on levels assigned to the securities on October 31, 2012. U.S. GAAP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate when a transaction is not orderly.

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS EQUITY FUND

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

The following is a summary of the fair values of the Fund's derivative instruments*:

The Effect of Financial Derivative Instruments on the Statements of Operations for the Six Month Period Ended April 30, 2013:

	Derivatives Not Accounted for as Hedging Instruments
	Foreign Exchange
Realized Loss on Derivatives Recognized resulting from Operations:	
Net Realized Loss on Forward Foreign Currency Exchange Contracts	\$ (1,422)

* See note 9 in the Notes to the Financial Statements for additional information.

At April 30, 2013, for U.S. federal income tax purposes, gross unrealized appreciation, gross unrealized depreciation, net unrealized appreciation/(depreciation) on investments in securities (including the effects of foreign currency translation) and the cost basis of investments were as follows:

Federal tax cost of investments	\$9,258,922
Gross tax appreciation of investments	\$753,060
Gross tax depreciation of investments	(573,087)
Net tax appreciation of investments	\$179,973

The difference between book basis and tax basis net unrealized appreciation or depreciation is attributable primarily to the tax deferral of losses on wash sales.

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS SMALL-CAP EQUITY FUND**SCHEDULE OF INVESTMENTS (CONTINUED)**

As of April 30, 2013 (Unaudited)

The Fund discloses all transfers between levels based on valuations at the end of each reporting period. At April 30, 2013, there were no transfers between Level 1, Level 2, Level 3 based on levels assigned to the securities on October 31, 2012. U.S. GAAP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased as well as guidance on identifying circumstances that indicate when a transaction is not orderly.

The following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used for the Fund during the period ending April 30, 2013:

Category and Subcategory	Beginning Balance at 10/31/2012	Purchases	Sales	Realized Gains	Realized Losses	Change in Unrealized Appreciation/ (Depreciation)	Transfer into Level 3	Transfer out of Level 3	Ending Balance at 4/30/2013
Investments, at value									
Common Stock	\$67,760	\$—	\$—	\$—	\$—	\$(811)	\$—	\$—	\$66,949
Total	\$67,760	\$—	\$—	\$—	\$—	\$(811)	\$—	\$—	\$66,949

See accompanying notes to the financial statements.

ASHMORE EMERGING MARKETS SMALL-CAP EQUITY FUND

SCHEDULE OF INVESTMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

See the table below on “Quantitative information about Level 3 Fair Value measurements” for information on the valuation techniques and inputs used to value Level 3 securities at April 30, 2013.

**Quantitative Information about Level 3 Fair Value Measurements
Ashmore Emerging Markets Small-Cap Equity Fund**

	Fair Value at 4/30/2013	Valuation Techniques	Unobservable Input
Common Stocks	\$66,949	Discount from last traded price	Discount Percentage of 25% ^(a)

^(a) Represents discount to last publicly traded price reported on applicable market.

The significant unobservable inputs used in the fair value measurement of the Fund’s investments are listed above. Generally, a change in the assumptions used in any input in isolation may be accompanied by a change in another input. Significant changes in any of the unobservable inputs may significantly impact the fair value measurement. The impact is based on the relationship between each unobservable input and the fair value measurement. The increase in discount percentage reduced the value of the security.

The following is a summary of the fair values of the Fund’s derivative instruments*:

The Effect of Financial Derivative Instruments on the Statements of Operations for the Six Month Period Ended April 30, 2013:

	Derivatives Not Accounted for as Hedging Instruments Foreign Exchange
Realized Loss on Derivatives Recognized resulting from Operations:	
Net Realized Loss on Forward Foreign Currency Exchange Contracts	\$(1,014)

* See note 9 in the Notes to the Financial Statements for additional information.

At April 30, 2013, for U.S. federal income tax purposes, gross unrealized appreciation, gross unrealized depreciation, net unrealized appreciation/(depreciation) on investments in securities (including the effects of foreign currency translation) and the cost basis of investments were as follows:

Federal tax cost of investments	\$26,559,373
Gross tax appreciation of investments	\$3,098,470
Gross tax depreciation of investments	(989,082)
Net tax appreciation of investments	\$2,109,388

The difference between book basis and tax basis net unrealized appreciation or depreciation is attributable primarily to the tax deferral of losses on wash sales.

See accompanying notes to the financial statements.

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS
As of April 30, 2013 (Unaudited)

1. Organization

Ashmore Funds (the “Trust”) is a Massachusetts business trust organized under the laws of The Commonwealth of Massachusetts on August 6, 2010 (inception date) and is registered under the Investment Company Act of 1940, as amended (the “Investment Company Act” or “1940 Act”), as an open-end investment management company. The Trust includes seven funds as of April 30, 2013, each with its own investment objective. The Ashmore Emerging Markets Corporate Debt, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Sovereign Debt Fund, Ashmore Emerging Markets Total Return Fund, Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund (each a “Fund” and collectively, the “Funds”) are separate investment funds of the Trust. Effective February 28, 2013, the Ashmore Emerging Markets Local Currency Fund changed its name to Ashmore Emerging Markets Currency Fund. Each of the Funds, except Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund, are non-diversified. Non-diversified funds may invest a relatively large portion of their net assets in a single issuer or a small number of issuers in comparison to a fund that is “diversified.” Each of the Funds is presented herein.

On December 8, 2010, the Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Sovereign Debt Fund and Ashmore Emerging Markets Total Return Fund commenced investment operations. From August 6, 2010 through December 7, 2010, these five Funds did not have any operations other than those actions relating to organizational matters, including the sale of 2,000 shares of each of these five Funds for cash in the amount of \$10.00 per share, or \$20,000 for each of these five Funds. Effective May 12, 2011, Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Sovereign Debt Fund and Ashmore Emerging Markets Total Return Fund began to offer Class A and C shares (“Retail Shares”). On June 22, 2011, the Ashmore Emerging Markets Equity Fund – Institutional Class commenced investment operations. On October 4, 2011, the Ashmore Emerging Markets Small-Cap Equity Fund – Institutional Class commenced investment operations. On September 30, 2011, the Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund launched Class A and C shares. Class A shares for the Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund were initially offered on February 27, 2012 and February 1, 2012, respectively. Class C shares for the Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund were initially offered on August 24, 2012.

Ashmore Investment Management Limited (“Ashmore” or the “Investment Manager” or “AIML”) serves as investment manager to the Funds. The Investment Manager has retained Ashmore EMM, L.L.C. (the “Subadviser”) to manage the investment portfolios of Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund. The Subadviser is responsible for managing the investment of the Funds’ assets, subject to the general oversight and supervision of the Investment Manager and the Board. Ashmore Investment Management (US) Corporation (“AIMUS”) is the principal underwriter of shares of the Funds. AIMUS is an affiliate of the Investment Manager. The Northern Trust Company (“Northern Trust”) serves as the administrator, custodian and transfer agent of the Funds.

2. Significant accounting policies

The significant accounting policies adopted and consistently followed in the preparation of the Funds’ financial statements are set out below:

(a) Basis of preparation

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”).

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

(b) Use of estimates

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. These financial statements contain all adjustments which are, in the opinion of management of the Trust, necessary to portray a fair statement of the period presented. Such adjustments are normal and recurring in nature. Valuation models used to determine the fair value of unlisted derivative instruments require the use of a number of market based assumptions.

(c) Determination of Net Asset Value

The net asset value (“NAV”) of a Fund’s shares is calculated at the close of regular trading (normally 4:00 p.m. Eastern time) (the “NYSE Close”) on each day that the New York Stock Exchange (“NYSE”) is open for regular trading.

(d) Investment valuation

For the purposes of calculating NAV, portfolio securities and other assets for which market quotations are readily available are valued at market value. Market values for securities and other instruments are generally determined on the basis of closing prices or the last reported sales prices on an exchange or other market, or if no sales are reported, based on quotes or other market information obtained from a quotation reporting system, established market makers, or pricing services. Domestic and foreign debt securities where the close of trading does not coincide with the NYSE close and non-exchange traded derivatives are normally valued on the basis of quotes obtained from brokers and dealers or pricing services using data reflecting the earlier closing of the principal markets for those securities. Prices obtained from independent pricing services are based on information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Certain debt securities purchased on a delayed delivery basis are marked-to-market daily until settlement. Short-term investments having a maturity of 60 days or less and sufficient credit quality are generally valued at amortized cost. Exchange traded options, futures and options on futures are valued at the settlement price determined by the relevant exchange. With respect to any portion of a Fund’s assets that are invested in one or more open-ended investment management companies, a Fund’s NAV will be calculated based upon the NAVs of such investments. The prospectuses for these open-end investment management companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

If the Investment Manager believes a non-U.S. (foreign) security’s value has materially changed after the close of the security’s primary exchange or principal market but before the NYSE Close, the security will be valued at fair value based on procedures approved by the Board of Trustees of the Trust, (the “Board”). A Fund may determine the fair value of investments based on information provided by pricing services and other third-party vendors, which may recommend fair value prices or adjustments with reference to other securities, indices or assets. The Funds may use fair value pricing more frequently for foreign securities or assets because, amongst other things, many foreign markets close well before the NAV of the Funds’ shares is next calculated. In considering whether fair value pricing is required and in determining fair values, the Investment Manager may, amongst other things, consider significant events (which may be considered to include changes in the value of U.S. securities or securities indices) that occur after the close of the relevant market and before the NYSE close. A Fund may utilize modeling tools provided by third-party vendors to determine the fair values of non-U.S. securities. Foreign exchanges may permit trading in foreign securities on days when the Trust is not open for business, which may result in the values of a Fund’s portfolio investments being affected when you are unable to buy, sell or exchange shares of the Fund.

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

Domestic fixed income and non-U.S. securities are normally priced using data reflecting the earlier closing of the principal markets for those securities, subject to possible fair value adjustments. Information that becomes known to a Fund or its agents after NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a security or NAV determined earlier that day.

Investments initially valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from pricing services. Foreign exchange rates are calculated as of 4:00 p.m. Eastern time on each day that the NYSE is open for regular trading. As a result, the NAV of a Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the NYSE is closed and an investor is not able to purchase, redeem or exchange shares of the Funds. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by the Board or persons acting at their direction. The Board has adopted methods and guidelines for valuing securities and other assets in circumstances where market quotes are not readily available, and has delegated to the Investment Manager and the Subadviser, as applicable, the responsibility for applying the valuation methods.

In the event that market quotes are not readily available, and the security or asset cannot be valued pursuant to one of the Board's approved valuation methods, the fair value of the security or asset will be determined in good faith by the Board, generally based upon recommendations provided by the Investment Manager and the Subadviser, as applicable. Market quotes are considered not readily available in circumstances where there is an absence of current or reliable market-based data (e.g., trade information, bid/asked information, broker quotes), including where events occur after the close of the relevant market, but prior to a Fund's NAV calculation time, that materially affect the values of a Fund's securities or assets. In addition, market quotes are considered not readily available when, due to extraordinary circumstances, the exchanges or markets on which the securities trade do not open for trading for the entire day and no other market prices are available. A Fund may also determine that market quotations are not readily available due to events relating to a single issuer (e.g., corporate actions or announcements) or events relating to multiple issuers (e.g., governmental actions or natural disasters). The Board has delegated to the Investment Manager and the Subadviser, as applicable, the responsibility for monitoring significant events that may materially affect the values of a Fund's securities or assets and for determining whether the value of the applicable securities or assets should be re-evaluated in light of such significant events.

The Investment Manager, as applicable, primarily employs a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information to determine the fair value of the investment. The Investment Manager may also apply a discount to the last traded price in situations where the last traded price may not represent the fair value of the security, such as if a security's trading has been suspended on its primary trading market, a security has been de-listed from its primary trading market, a security has not traded for an extended period of time, or a security's primary trading market is temporarily closed at a time when under normal conditions it would be open. Any such discount is based on a number of factors including but not limited to the circumstances surrounding any potential suspension or de-listing, market and industry conditions, competitor information, and the period of time since the last trading took place.

When a Fund uses fair value pricing to determine the NAV of its shares, securities will not be priced on the basis of quotes from the primary market in which they are traded, but rather may be priced by another method that the Board or persons acting at its direction believe accurately reflects fair value. Fair value pricing may require subjective determinations about the value of a security or asset. While the Funds' policies are intended to result in a calculation of a Fund's NAV that fairly reflects security and asset values as of the time of pricing, the Funds cannot ensure that fair values determined by the Board or persons acting at their direction accurately reflects the price that a Fund could obtain for a security or asset if it were to dispose of that security or asset at the time of pricing (for instance, in a forced or distressed sale). The prices used by a Fund may differ from the value that would be realized if the securities were sold. Also, the use of fair value pricing may not always

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

result in adjustments to the prices of securities or other assets held by the Fund for the purpose of calculating the NAV of the Fund's shares.

(e) Investment transactions, income and expenses

Investment transactions are recorded at the trade date. The Funds determine the gain or loss realized from investment transactions using an identified cost basis method. Interest income is recognized on an accrual basis and includes the amortization of premiums and the accretion of discounts using the effective yield method. Dividend income is recognized on the ex-dividend date. Dividends from foreign securities are recorded on the ex-dividend date, or as soon as such information is available.

Expenses are recorded on an accrual basis. Each Fund is charged for those expenses that are directly attributable to that Fund. Certain expenses arising in connection with a class of shares are charged to that class of shares. Expenses incurred which do not specifically relate to an individual Fund are allocated amongst all the Funds in the Trust in proportion to each Fund's relative net assets.

(f) Fully funded total return swaps

Each Fund is subject to market risk in the normal course of pursuing its investment objectives. Certain Funds enter into fully funded total return swaps ("TRS") to manage their exposure to the market, certain sectors of the market or a particular security or reference asset, or to create exposure to certain investments to which they would otherwise not be exposed. TRS contracts involve the exchange by a Fund and a counterparty of their respective commitments to pay or receive a net amount based on the change in the fair value of a particular security or index and a specified notional amount.

Where a Fund enters into a TRS transaction with a swap counterparty, pursuant to which the Fund makes an initial payment equal to the estimated value of an emerging market debt or equity security, loan or other financial instrument, the TRS are considered investments for financial statement purposes and are accounted for using the same policies as would apply to the underlying assets they represent. Aside from the market risk of the underlying securities, there is a risk of default by the counterparty to the transaction.

(g) Equity-Linked Securities

Certain Funds may purchase equity-linked securities, also known as participation notes. Equity-linked securities are primarily used by the Funds as an alternate means to efficiently and effectively access what is generally an emerging securities market. A Fund deposits cash with its custodian (or broker) in an amount near or equal to the selling price of the underlying security, in exchange for an equity linked security. Upon sale, the Fund receives cash from the broker or custodian, equal to the value of the underlying security. Aside from the market risk and credit risk of the underlying securities, there is a risk of default by the counterparty to the transaction. In the event of insolvency of the counterparty, a Fund might be unable to obtain its expected benefit. In addition, while the Funds will seek to enter into such transactions only with parties that are capable of entering into closing transactions with a Fund, there can be no assurance that a Fund will be able to close out such a transaction with the counterparty or obtain an offsetting position with any counterparty, at a time prior to the end of the term of the underlying agreement.

(h) Reverse Repurchase Agreements

Certain Funds may enter into reverse repurchase agreements. In a reverse repurchase agreement, a Fund sells a security that it holds to a financial institution with a simultaneous agreement to repurchase the same security at an agreed-upon price and date. Securities sold under reverse repurchase agreements are reflected as a liability on the Statements of Assets and Liabilities. Interest payments made are recorded as a component of interest expense on the Statements of Operations. In periods of increased demand for the security, a Fund may receive a fee for use of the security by the counterparty, which may result in interest income to the Fund. A reverse repurchase agreement involves the risk that the market value of the security sold by a Fund may decline below

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

the repurchase price of the security. A Fund will segregate assets determined to be liquid by the investment adviser or otherwise cover its obligations under reverse repurchase agreements.

3. Principal risks

In the normal course of business the Funds trade financial instruments and enter into financial transactions where a risk of potential loss exists due to, amongst other things, changes in the market (market risk), or the failure or inability of the other party to a transaction to perform (credit and counterparty risk). See below for a summary description of select principal risks, some of which may not apply to a particular Fund. For more information, please see the Funds' prospectuses.

Convertible Securities Risk

Securities that are convertible into preferred or common stocks are subject to the risks of both debt and equity securities and the risk of changes in value at a different rate than the underlying stocks. Convertible securities, particularly high-yield or junk bonds, are subject to greater levels of credit and liquidity risk, may be speculative and may decline in value due to changes in interest rates or an issuer's or counterparty's deterioration or default.

Counterparty and Third Party Risk

Transactions involving a counterparty to a derivative or other instrument, or a third party responsible for servicing the instrument, are subject to the credit risk of the counterparty or third party, and to the counterparty's or third party's ability to perform in accordance with the terms of the transaction.

Credit Risk

The Funds could lose money if the issuer or guarantor of a debt security or other instrument is unable or unwilling to meet its financial obligations, and the lack of ability, or perceived lack of ability, of the issuer to make timely payments of interest and/or principal will negatively affect the value of the security or instrument.

Currency Management Strategies Risk

Currency management strategies, including the use of forward currency contracts and other derivatives, may substantially change the Funds' exposure to currencies and currency exchange rates and could result in losses to the Funds if currencies do not perform as the Investment Manager anticipates.

Currency Risk

Foreign (non-U.S.) currencies may decline in value relative to the U.S. dollar and adversely affect the value of the Funds' investments in foreign currencies, securities denominated in foreign currencies or derivatives that provide exposure to foreign currencies.

Derivatives Risk

Investing in derivative instruments may be considered risky and involves correlation, documentation, interest rate, leverage, liquidity, market, management, and valuation risks and the risk of losing more than the principal amount invested.

Emerging Markets Risk

Compared to foreign developed markets, investing in emerging markets may involve heightened volatility, greater political, regulatory, legal and economic uncertainties, less liquidity, dependence on particular commodities or international aid, high levels of inflation, greater custody risk, and certain special risks associated with smaller companies.

Equity Securities Risk

Equity securities may react more strongly to changes in an issuer's financial condition or prospects than other securities of the same issuer.

Focused Investment Risk

Focusing a fund's investments in a limited number of issuers, sectors or industries increases risk and the volatility of the value of a fund's shares. A Fund may be particularly susceptible to economic, political, regulatory or other events affecting the issuers, sectors or industries due to the extent that it focuses its investments.

Foreign Investment Risk

Investments in foreign (non-U.S.) issuers, directly or through the use of depositary receipts, may be negatively affected by adverse political, regulatory, economic, market or other developments affecting issuers located in foreign countries, currency exchange rates or regulations, or foreign withholding taxes. Investing in foreign securities may result in the Funds experiencing more rapid and extreme changes in value than a fund that invests exclusively in the securities of U.S. issuers.

Geographic Focus Risk

The Funds may be particularly susceptible to economic, political or regulatory events affecting those countries or regions in which the Funds focus their investments.

High Yield Risk

Below investment grade securities and unrated securities of similar credit quality (commonly known as "high yield" securities or "junk bonds") are subject to greater levels of credit and liquidity risks than higher quality securities, and are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments.

Inflation/Deflation Risk

The value of the Funds' investments may decline as inflation reduces the value of money; conversely, if deflation reduces prices throughout the economy, there may be an adverse effect on the creditworthiness of issuers in whose securities the Funds invest and an increase in the likelihood of issuer defaults.

Interest Rate Risk

Debt and other securities and instruments may decline in value due to changes in interest rates, the extended duration of principal payments at below-market interest rates, and/or prepayment.

Investments in Pooled Vehicles Risk

Investing in another investment company or pooled vehicle subjects the Funds to that company's risks, and, in general, to a pro rata portion of that company's fees and expenses in addition to fees and expenses charged by the Funds.

IPO Risk

Securities offered in initial public offerings (IPOs) are subject to many of the same risks of investing in small companies and often to a heightened degree, their values may be highly volatile, they may have no trading history and information about the issuer may have been available for only limited periods.

Issuer Non-Diversification Risk

The Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Sovereign Debt Fund and the Ashmore Emerging Markets Total Return Fund are "non-diversified" and are therefore more susceptible to the risks of focusing investments in a small number of issuers, industries or foreign currencies, as well as the risks of a single economic, political or regulatory occurrence, than funds that are "diversified".

Issuer Risk

The value of a security or instrument may decline for reasons directly related to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods or services.

Large Shareholder Risk

Shareholders of the Funds, such as institutional investors, may disrupt the efficient management of the Funds' operations by purchasing or redeeming Fund shares in large amounts.

Leverage Risk

The use of leverage, including through borrowings, derivatives and reverse repurchase agreements, will increase the volatility of the Funds' investment portfolio and magnify the Funds' investment losses or gains.

Limited Operating History Risk

The Funds have a limited operating history for investors to evaluate and may not achieve the desired asset levels to maximize investment and operational efficiencies.

Liquidity Risk

Illiquid securities and other instruments may be highly volatile, difficult to value, and difficult to sell or close out at favorable prices or times.

Management Risk

The Funds' investment returns depend on the ability of the Investment Manager to manage the Funds' portfolio successfully; there is a risk that the Investment Manager may be incorrect in its analysis of economic trends, currencies, countries, industries, companies, and the relative attractiveness of asset classes or other matters.

Market Risk

The value of securities and instruments owned by the Funds may rise and fall, sometimes rapidly or unpredictably, due to factors affecting securities markets generally or particular industries or geographic areas.

Mortgage-Backed and Asset-Backed Risk

Payments on underlying assets, including mortgages or other obligations, may be delayed, prepaid, subordinated or defaulted on. Rising interest rates tend to extend the duration of these securities, making them more sensitive to changes in interest rates.

Over-the-Counter Risk

Securities and derivatives traded in over-the-counter markets may trade less frequently and in limited volumes and thus exhibit more volatility and liquidity risk. The prices paid by the Funds in over-the-counter transactions may include an undisclosed dealer markup.

Portfolio Turnover Risk

If the Funds frequently trade their securities, this will increase transaction costs, may result in taxable capital gains, and may reduce the Funds' investment performance.

Small and Mid-Sized Companies Risk

Investments in securities issued by small and mid-sized companies tend to be more vulnerable to adverse developments than larger companies, and may present increased volatility and liquidity risk.

Valuation Risk

Certain securities and instruments may be difficult to value, and to the extent the Funds sell a security or instrument at a price lower than that used to value the security, their net asset value will be adversely affected.

4. Fair value measurements

U.S. GAAP includes a topic which defines fair value as the price that the Fund would receive upon selling an investment in a timely transaction to a market participant in the principal or most advantageous market of the investment in an orderly transaction. This topic establishes a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

measurements for disclosure purposes. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability including assumptions about risk. Such risks include the inherent risk in a particular valuation technique which is used to measure fair value. This may include the pricing model and/or the inputs to the pricing model used in the valuation technique. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 – Inputs using unadjusted quoted prices in active markets or exchanges for identical assets and liabilities.
- Level 2 – Significant observable inputs other than those used in Level 1, which may include, but are not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment rates, loss severities, credit risks and default rates) or other market corroborated inputs.
- Level 3 – Significant unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available, which may include assumptions made by the Board or persons acting at their discretion that are used in determining the fair market value of investments.

Fixed income securities including corporate, convertible and municipal bonds and notes, U.S. government agency securities, U.S. treasury obligations, sovereign issues, bank loans, convertible preferred securities and non-U.S. bonds are normally valued based on evaluations provided by pricing service providers that use broker dealer quotations, reported trades or valuation estimates from their internal pricing models. The service providers' internal models use inputs that are observable such as issuer details, interest rates, yield curves, prepayment rates, credit risks/spreads, default rates and quoted prices for similar assets. Securities that use similar valuation techniques and inputs to those described above are typically categorized as Level 2 of the fair value hierarchy.

Fixed income securities purchased on a delayed-delivery basis are marked to market daily until their settlement at the forward settlement date and are typically categorized as Level 2 of the fair value hierarchy.

Common stocks, exchange-traded funds and financial derivative instruments, such as futures contracts or options contracts that are traded on a national securities exchange, are stated at the last reported sale or settlement price on the day of valuation. To the extent these securities are actively traded and valuation adjustments are not applied, they are typically categorized as Level 1 of the fair value hierarchy. Valuation adjustments may be applied to certain securities that are solely traded on a foreign exchange to account for the market movement between the close of the foreign market and the close of the NYSE. These securities are valued using pricing service providers that consider the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments. Securities using these valuation adjustments are typically categorized as Level 2 of the fair value hierarchy. Preferred securities, equity linked notes and other equities traded on inactive markets or valued by reference to similar instruments are also typically categorized as Level 2 of the fair value hierarchy.

Investments in registered open-end investment management companies will be valued based upon the NAVs of such investments and are categorized as Level 1 of the fair value hierarchy. Investments in privately held investment funds will be valued based upon the NAVs of such investments and are categorized as Level 2 of the fair value hierarchy.

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

Short-term investments having a maturity of 60 days or less are generally valued at amortized cost which approximates fair market value. These investments are categorized as Level 2 of the fair value hierarchy.

Over-the-counter derivative financial instruments, such as foreign currency contracts, options contracts, or swaps agreements, derive their value from underlying asset prices, indices, reference rates, and other inputs or a combination of these factors. These contracts are normally valued on the basis of broker dealer quotations or pricing service providers. Depending on the product and the terms of the transaction, the value of the financial derivative contracts can be estimated by a pricing service provider using a series of techniques, including simulation pricing models. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, curves, dividends and exchange rates. Financial derivatives that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

Investments and derivatives classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. Level 3 instruments may include private equity and real estate investments, certain loan agreements, less-liquid corporate debt securities (including distressed debt instruments) and certain collateralized debt obligations. Also included in this category are options, government and sovereign obligations, government agency securities and corporate bonds for which independent broker prices are used and information relating to the inputs of the price models is currently unavailable.

5. Capital share transactions

Transactions in Class A shares for the period ended April 30, 2013, were as follows:

As of April 30, 2013 (Unaudited)

Capital shares

Class A or Class C shares are issued at the Fund's relevant NAV per share plus any applicable sales charge for Class A shares. Institutional Class shares are issued at the Fund's relevant NAV per share without a sales charge. Shares confer upon the holders the right to receive notice of and attend, speak and vote at general meetings of the Funds. The shares confer upon the holders the right to any or all dividends or distributions which the Trustees in their sole discretion may from time to time resolve to make or declare.

6. Investment transactions

For the period ended April 30, 2013, the aggregate costs of purchases and proceeds from sales of investments (including fully funded TRS and excluding short-term investments) for the Funds were as follows:

Fund	Purchases	Sales
Ashmore Emerging Markets Corporate Debt Fund	\$68,616,190	\$13,566,873
Ashmore Emerging Markets Local Currency Bond Fund	62,117,916	42,820,428
Ashmore Emerging Markets Currency Fund	754,755	-
Ashmore Emerging Markets Sovereign Debt Fund	27,885,683	24,408,361
Ashmore Emerging Markets Total Return Fund	305,188,417	237,540,831
Ashmore Emerging Markets Equity Fund	4,803,600	4,528,180
Ashmore Emerging Markets Small-Cap Equity Fund	25,735,822	13,108,593

7. Federal income taxes

No provision for U.S. federal income taxes has been made since each Fund's policy is to comply with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies, and to distribute, each year, substantially all of its taxable income and capital gains to its shareholders.

For financial reporting purposes the Funds may periodically make reclassifications among components of capital accounts to reflect permanent differences between U.S. GAAP and taxable income. The reclassifications have no impact on the net assets of the Funds. During the year, revisions were made to previously determined taxable income amounts. As a result, the following reclassifications were made to the Statements of Assets and Liabilities:

Fund	Paid in Capital	Undistributed Net Investment Income	Accumulated Net Realized Gain/Loss	Net Unrealized Appreciation
Ashmore Emerging Markets Corporate Debt Fund	\$ -	\$ 36,226	\$ 4,294	\$(40,520)
Ashmore Emerging Markets Local Currency Bond Fund	202,110	-	209,413	(411,523)
Ashmore Emerging Markets Total Return Fund	130,575	560,417	(322,697)	(368,295)

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

At October 31, 2012, the capital loss carryforwards for U.S. federal income tax purposes and their respective years of expiration were as follows:

Fund	October 31, 2019
Ashmore Emerging Markets Currency Fund	\$ (4,413)

The Regulated Investment Company Modernization Act of 2010 (the “Act”) was enacted on December 22, 2010. The Act makes changes to several tax rules affecting the Funds. In general, the provisions of the Act are effective for the Funds’ fiscal year ending October 31, 2012. Although the Act provides several benefits, including the unlimited carryover of future capital losses, there may be a greater likelihood that all, or a portion of a Fund’s pre-enactment capital loss carryovers may expire without being utilized, due to the fact that post-enactment capital losses are utilized before pre-enactment capital loss carryovers.

The following Funds have available capital loss carryforwards for which there is no expiration date:

Fund	Short-Term Capital Loss Carryforward at October 31, 2012	Long-Term Capital Loss Carryforward at October 31, 2012
Ashmore Emerging Markets Equity Fund	\$ (1,297,904)	\$ -
Ashmore Emerging Markets Currency Fund	-	(2,870)

The Funds in the above two tables may offset future capital gains with these capital loss carryforwards.

The Funds are subject to the provisions of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 740-10, *Income Taxes*. This standard provides guidance as to how uncertain tax positions should be recognized, measured, presented and disclosed in the Funds’ financial statements. The Funds recognize the tax benefits of uncertain tax positions only where the position is more-likely-than-not (i.e. greater than 50-percent) to be sustained assuming examination by a tax authority based on the technical merits of the position. In evaluating whether a tax position has met the recognition threshold, the Funds must presume that the position will be examined by the appropriate taxing authority that has full knowledge of all relevant information. A tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the Funds’ financial statements. Income tax and related interest and penalties would be recognized by the Funds as tax expense in the statement of operations if the tax positions were deemed not to meet the more-likely-than-not threshold. The Funds analyze all open tax years for all major taxing jurisdictions. Open tax years are those that are open to examination by taxing authorities, as defined by the Statute of Limitations in each jurisdiction. The Funds have no examinations by tax authorities in progress. Management has analyzed the Funds’ tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions. Further, Management is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

As of October 31, 2012, the components of distributable taxable earnings, including temporary differences, were as follows:

Fund	Undistributed Ordinary Income	Undistributed Long Term Capital Gain	Accumulated Capital Losses and Other	Unrealized Appreciation (Depreciation) on Investments and Foreign Currencies	Total Accumulated Earnings (Deficit)
Ashmore Emerging Markets Corporate Debt Fund	\$ 151,435	\$ 94,032	\$ (35,001)	\$ 138,545	\$349,011
Ashmore Emerging Markets Local Currency Bond Fund	-	-	(96,283)	2,208,747	2,112,464

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

Fund	Undistributed Ordinary Income	Undistributed Long Term Capital Gain	Accumulated Capital Losses and Other	Unrealized Appreciation (Depreciation) on Investments and Foreign Currencies	Total Accumulated Earnings (Deficit)
Ashmore Emerging Markets Currency Fund	1,809,816	-	(31,004)	175,570	1,954,382
Ashmore Emerging Markets Sovereign Debt Fund	88,704	61,828	(39,062)	3,225,398	3,336,868
Ashmore Emerging Markets Total Return Fund	8,933,641	-	(402,679)	13,802,047	22,333,009
Ashmore Emerging Markets Equity Fund	-	-	(1,298,335)	(71,489)	(1,369,824)
Ashmore Emerging Markets Small-Cap Equity Fund	1,099,388	30,847	-	736,932	1,867,167

The taxable character of distributions paid during the fiscal year ended October 31, 2012, were as follows:

Fund	Distributions From				
	Ordinary Income	Short-Term Capital Gains	Long-Term Capital Gains	Return of Capital	Total Distributions Paid
Ashmore Emerging Markets Corporate Debt Fund	\$ 1,068,991	\$ 66,324	\$ -	\$ -	\$1,135,315
Ashmore Emerging Markets Local Currency Bond Fund	2,007,944	497,423	-	-	2,505,367

Ashmore Emerging Markets Sovereign Debt Fund	1,514,004	-	-	-	1,514,004
Ashmore Emerging Markets Total Return Fund	9,666,192	-	-	-	9,666,192
Ashmore Emerging Markets Equity Fund	101,642	-	-	4,929	106,571
Ashmore Emerging Markets Small-Cap Equity Fund	39,065	53,933	-	-	92,998

8. Distributions to shareholders

The Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Sovereign Debt Fund and Ashmore Emerging Markets Total Return Fund declare distributions of their net investment income daily and pay such distributions monthly. The Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund declare and pay distributions of their net investment income at least quarterly.

Distributions of net realized capital gains, if any, are declared and paid at least annually. The Funds may also make a special distribution to comply with federal tax requirements. Income dividends and capital gains distributions determined in accordance with federal income tax regulations may differ from U.S. GAAP. Differences between tax regulations and U.S. GAAP may change the fiscal period in which income and capital items are recognized for tax and U.S. GAAP purposes. Examples of events that give rise to timing differences include wash sales, straddles and capital loss carryforwards. Further, the character of investment income and capital gains may be different for certain transactions under the two methods of accounting. Examples of characterization differences include the treatment of foreign currency transactions and swap transactions. As a result, income dividends and capital gain distributions declared during a fiscal period for federal tax purposes may differ significantly from the net investment income and realized capital gain reported on each Fund's financial statements presented under U.S. GAAP. In general, to the extent that any differences which are permanent in nature result in over distributions to shareholders, the amount of the over distribution may be

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

reported as return of capital. Temporary differences do not require reclassification. See Note 7 for further details.

9. Derivative instruments and hedging activities

FASB ASC Topic 815-10 (“Topic 815-10”), *Disclosures about Derivative Instruments and Hedging Activities*, improves financial reporting about derivative instruments by requiring enhanced disclosures to enable investors to better understand how and why the Funds use derivative instruments, how these derivative instruments are accounted for and their effects on the Funds’ financial position and results of operations.

None of the derivatives held in the Funds have been designated as hedging instruments under Topic 815-10. A discussion of the strategies for these derivatives and their counterparty credit risk can be found below.

In accordance with Topic 815-10, the Funds record their trading-related derivative activities on a fair value basis (as described in Note 4). Fair values represent the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following disclosures contain information on how and why the Funds use derivative financial instruments; the credit-risk-related contingent features in certain derivative financial instruments; and how derivative financial instruments affect the Funds’ financial position, results of operations and cash flows. The location and fair value of these instruments on the Statements of Assets and Liabilities and the realized, and changes in unrealized, gains and losses on the Statements of Operations, are included in tables following each of the Fund’s Schedule of Investments and categorized by type of financial derivative contract.

(a) Options

Each Fund is subject to market risk in the normal course of pursuing its investment objectives. The Funds have entered into options to speculate on the price movements of the financial instrument underlying the option, for use as an economic hedge against certain equity positions held in a Fund’s portfolio holdings or for other investment purposes. Option contracts give a Fund the right, but not the obligation, to buy or sell within a limited time, a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

Options written obligate a Fund to buy or sell within a limited time, a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices. Options written by a Fund may expose a Fund to the market risk of an unfavorable change in the financial instrument underlying the written option.

A Fund is exposed to counterparty risk from the potential that a seller of an option contract does not sell or purchase the underlying asset as agreed under the terms of the option contract. The maximum risk of loss from counterparty risk to a Fund holding a put or call option is generally the fair value of the contracts and the premiums paid to purchase its open option contracts. The risk of loss on call options sold by the Funds is potentially unlimited. A Fund considers the credit risk of the intermediary counterparties to its option transactions in evaluating potential credit risk.

Gains and losses associated with the valuation of options are recognized at fair value as the net change in unrealized appreciation/(depreciation) on investments in securities in the Statements of Operations. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realized gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currency purchased. Premiums paid on the purchase of options that expire unexercised are recorded as realized losses and are reflected in net realized gain/(loss) on investments in securities in the Statements of Operations.

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)

As of April 30, 2013 (Unaudited)

For the period ended April 30, 2013, the Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund and Ashmore Emerging Markets Total Return Fund had an average contract notional exposure of \$70,857, \$42,336, and \$196,889, respectively, related to options contracts.

(b) Forward foreign currency exchange contracts

A forward foreign exchange contract involves an obligation to purchase or sell a specific currency at a future date at a price set at the time the contract is made. The Funds have entered into forward foreign currency exchange contracts in connection with settling planned purchases or sales of securities, as part of an investment strategy to protect against uncertainty in the level of future foreign exchange rates in the purchase and sale of securities, or to gain exposure to foreign currencies. All forward foreign currency exchange contracts are valued daily at the applicable exchange rates. Any resulting unrealized gains or losses are recorded in net change in unrealized appreciation/(depreciation) on forward foreign currency exchange contracts in the Statements of Operations. A Fund records realized gains or losses at the time the forward foreign exchange contract is offset by entering into a closing transaction with the same counterparty or is extinguished by delivery of the currency. Realized gains or losses, if any, are included in net realized gain/(loss) on forward foreign exchange contracts in the Statements of Operations.

Risks arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The contractual amounts of forward foreign currency exchange contracts do not necessarily represent the amounts potentially subject to risk. The measurement of the risks associated with these instruments should be considered in light of all related and offsetting transactions. The Funds bear market risk from changes in foreign currency exchange rates and credit risk if the counterparty fails to perform. Further information on the impact of these positions on the Funds' financial statements can be found in Note 11.

For the period ended April 30, 2013, the Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Total Return Fund, Ashmore Emerging Markets Small-Cap Equity Fund and Ashmore Emerging Markets Equity Fund had an average contract notional exposure of \$536,918, \$183,010,849, \$180,639,566, \$687,250,075, \$176,402 and \$19,912, respectively, related to forward foreign currency exchange contracts.

(c) Futures contracts

Futures contracts obligate the buyer to take and the seller to make delivery at a future date of a specified quantity of a financial instrument or an amount of cash based on the value of securities indices, commodities or the fair value in U.S. dollars of a foreign currency.

The Funds' participation in the futures markets involves certain risks, including the imperfect correlation between movements in the price of the futures contracts and movements in the price of the underlying securities. Risks may arise from the potential inability of a counterparty to meet the terms of the contract. Credit risk is mitigated to the extent that the exchange on which a particular futures contract is traded assumes the risk of a counterparty defaulting on its obligations under the contract.

At the time the Funds enter into a futures contract, the Funds deposit and maintain as collateral initial margin with the broker, as required by the exchange on which the transaction is effected. Pursuant to the contract, the Funds agree to receive from or pay to the broker an amount of cash equal to the fluctuation in the value of the contract. Such receipts or payments are determined by the rules of the futures exchange and are known as variation margin. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the time it was closed. This amount is included in net realized gain or loss on futures contracts in the Statement of Operations. Any unrealized gains or losses on open futures contracts are included in net change in unrealized appreciation (depreciation) on futures contracts in the Statement of Operations.

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)
As of April 30, 2013 (Unaudited)

For the period ended April 30, 2013, the Funds did not hold futures contracts.

(d) Interest rate swaps

During the reporting period, certain Funds entered into interest rate swaps, which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage the Funds' exposure to interest rates. Interest rate swaps are marked to market daily and the change in fair value, if any, is recorded as unrealized gain or loss. Payments made or received are recorded as part of realized gains and losses. Certain Funds could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligations to perform.

Interest rate swaps are recorded at their fair value. The fair value is based on quoted market prices or prices obtained from a third party provider at the date of the Statements of Assets and Liabilities, without any deduction for estimated future selling costs. The periodic payments on the swap agreements entered into by the Funds are reflected in the Statement of Operations within net realized gain/(loss) on interest rate swap contracts. Unrealized gains are reported as an asset and unrealized losses are reported as a liability in the Statements of Assets and Liabilities. Changes in the fair value are reflected in the Statements of Operations within net change in unrealized appreciation/(depreciation) on interest rate swap contracts in the period in which they occur.

For the period ended April 30, 2013, the Ashmore Emerging Markets Local Currency Bond and Ashmore Emerging Markets Total Return Funds had average notional exposures of \$12,160,064 and \$14,783,597, respectively, related to interest rate swap contracts.

10. Related parties

Investment management fees

The Trust has an Investment Management Agreement (the "Agreement") with the Investment Manager, with whom certain officers and directors of the Trust are affiliated, to furnish investment management services to the Funds. Under the terms of the Agreement, the Trust, on behalf of the Funds, compensates the Investment Manager for its investment management services at the following rates, based on each Fund's average daily net assets:

Fund	Rate
Ashmore Emerging Markets Corporate Debt Fund	1.15%
Ashmore Emerging Markets Local Currency Bond Fund	0.95%
Ashmore Emerging Markets Currency Fund	0.85%
Ashmore Emerging Markets Sovereign Debt Fund	0.90%
Ashmore Emerging Markets Total Return Fund	1.00%
Ashmore Emerging Markets Equity Fund	1.15%
Ashmore Emerging Markets Small-Cap Equity Fund	1.50%

The Investment Manager has contractually agreed to waive its fees or reimburse each Fund for other expenses until February 28, 2014, to the extent that total operating expenses (other than acquired fund fees and expenses, interest expenses, taxes, extraordinary expenses and certain credits and offset arrangements) for each class of shares of each Fund exceed the rates in the table below, based on each Fund's average daily net assets. The expense limitation arrangement may be terminated by the Board at any time.

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)
As of April 30, 2013 (Unaudited)

Fund	Class A	Class C	Institutional Class
Ashmore Emerging Markets Corporate Debt Fund	1.45%	2.20%	1.17%
Ashmore Emerging Markets Local Currency Bond Fund	1.25%	2.00%	0.97%
Ashmore Emerging Markets Currency Fund	1.15%	1.90%	0.87%
Ashmore Emerging Markets Sovereign Debt Fund	1.20%	1.95%	0.92%
Ashmore Emerging Markets Total Return Fund	1.30%	2.05%	1.02%
Ashmore Emerging Markets Equity Fund	1.45%	2.20%	1.17%
Ashmore Emerging Markets Small-Cap Equity Fund	1.80%	2.55%	1.52%

Any such waiver or reimbursement is subject to the Investment Manager's right to recover amounts waived or reimbursed to the extent actual fees and expenses for a future fiscal period are less than each Fund's expense limitation cap, provided, however, that the Investment Manager shall only be entitled to recover such amounts waived or reimbursed during the previous three fiscal years. The total accumulated amount subject to recovery in future years is \$576,969 for Ashmore Emerging Markets Corporate Debt Fund, \$691,551 for Ashmore Emerging Markets Local Currency Bond Fund, \$651,357 for Ashmore Emerging Markets Currency Fund, \$596,510 for Ashmore Emerging Markets Sovereign Debt Fund, \$1,085,084 for Ashmore Emerging Markets Total Return Fund, \$455,970 for Ashmore Emerging Markets Equity Fund and \$406,629 for Ashmore Emerging Markets Small-Cap Equity Fund.

Subadviser fees

For the services provided, the Investment Manager pays the Subadviser at the following rates, based on each Fund's average daily net assets:

Fund	Institutional Class
Ashmore Emerging Markets Equity Fund	0.92%
Ashmore Emerging Markets Small-Cap Equity Fund	1.20%

Distribution fees

The Funds have adopted Amended Plans of Distribution and Servicing Fees pursuant to Rule 12b-1 under the 1940 Act ("Distribution and Servicing Fee Plans"). Under the Distribution and Servicing Fee Plans, each of the Funds may pay fees to the distributor on an ongoing basis as compensation for the services the distributor renders and the expenses it bears in connection with the sale and distribution of Fund shares ("distribution fees") and/or in connection with personal services rendered to Fund shareholders and the maintenance of shareholder accounts ("servicing fees"). Class A and C shares each have a separate 12b-1 Plan. Class A shares pay only servicing fees. Class C shares pay both distribution and servicing fees. The following table lists the maximum annual rates at which the distribution and/or servicing fees may be paid under each 12b-1 Plan (calculated as a percentage of a Fund's average daily net assets attributable to the particular class of shares):

	Servicing Fee	Distribution Fee
Class A shares	0.25%	None
Class C shares	0.25%	0.75%

Investor Ownership

On November 19, 2010, Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Sovereign Debt Fund and Ashmore Emerging Markets Total Return Fund were seeded. On June 22, 2011, Ashmore Emerging Markets Equity Fund was seeded. On October 4, 2011, Ashmore Emerging Markets Small-Cap Equity Fund was seeded. Each of the Funds was seeded by Ashmore Investments UK Limited, the parent of the Investment Manager. Ashmore Investments UK Limited seeded each Fund with \$10 million, except the Ashmore Emerging Markets Total Return Fund, which was seeded with \$20 million.

As of April 30, 2013, Ashmore Investments UK Limited owned the following percentages of outstanding shares of each Fund:

Fund	Institutional Class
Ashmore Emerging Markets Corporate Debt Fund	7.55%
Ashmore Emerging Markets Currency Fund	20.03%
Ashmore Emerging Markets Equity Fund	65.93%
Ashmore Emerging Markets Small-Cap Equity Fund	82.39%

In addition to the Ashmore Investments UK Limited ownership, shown in the table above, the following Funds had other investors owning greater than 5% of the outstanding shares of such Funds:

Fund	Class	# of Investors Owning > 5% of outstanding Shares	% of Ownership by Investor
Ashmore Emerging Markets Corporate Debt Fund	Class A	1	84.61%
	Class C	4	37.21%, 33.98%, 14.31%, 8.17%
	Class I	2	11.57%, 7.68%
Ashmore Emerging Markets Local Currency Bond Fund	Class A	3	22.43%, 7.22%, 5.24%
	Class C	4	43.42%, 28.08%, 10.29%, 7.23%
	Class I	4	39.95%, 28.56%, 12.95%, 10.14%
Ashmore Emerging Markets Currency Fund	Class A	1	100.00%
	Class C	1	100.00%
	Class I	2	65.33%, 11.66%
Ashmore Emerging Markets Sovereign Debt Fund	Class A	2	91.29%, 8.71%
	Class C	1	100.00%
	Class I	2	80.54%, 19.46%

11. Financial instruments with off-balance sheet risk and concentration of credit risk

Derivative financial instruments may result in off-balance sheet market and credit risk. Market risk is the possibility that future changes in market price may make a financial instrument less valuable. If the markets should move against one or more positions that the Funds hold, the Funds could incur losses greater than the unrealized amounts recorded in the Statements of Assets and Liabilities.

Credit risk is the risk that the counterparty will default and fail to fulfill the terms of the agreement.

Derivative risk exposures are discussed in note 9.

12. Recent accounting pronouncements

In December 2011, the FASB issued Accounting Standards Update (“ASU”) No. 2011-11, *Disclosures about Offsetting Assets and Liabilities* (“ASU 2011-11”), to enhance disclosures about financial instruments and derivative instruments that are subject to offsetting (“netting”) on the statement of assets and liabilities. This information will enable users of a Fund’s financial statements to evaluate the effect or potential effect of netting arrangements on a Fund’s financial position.

In January 2013, the FASB issued ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities*, which replaced ASU 2011-11. ASU 2013-01 limits the scope of the new statement of assets and liabilities offsetting disclosures to derivatives, repurchase agreements and securities lending transactions to the extent that they are 1) offset in the financial statements or 2) subject to an enforceable master netting arrangement or similar agreement. Both ASU 2011-11 and ASU 2013-01 are effective prospectively for interim or annual periods beginning on or after January 1, 2013. At this time, the Funds’ management is evaluating the implications of this requirement and the impact it will have on the Funds’ financial statement footnote disclosures, if any.

ASHMORE FUNDS
NOTES TO FINANCIAL STATEMENTS (CONTINUED)
As of April 30, 2013 (Unaudited)

13. Subsequent events

Management has evaluated subsequent events for the Funds through the date the financial statements were issued, and has concluded that there are no identified subsequent events relevant for financial statement adjustment or disclosure.

ADVISORY AGREEMENT APPROVAL

At an in-person meeting of the Board of Trustees of Ashmore Funds (the “Trust”) held on March 27, 2013, the Board, including a majority of the Trustees who are not “interested persons” of the Trust within the meaning of the Investment Company Act of 1940, as amended (the “1940 Act”) (the “Independent Trustees”), voting separately, considered and unanimously approved the continuation of the Investment Management Agreement between Ashmore Investment Management Limited (“AIML”) and the Trust, on behalf of each of Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Sovereign Debt Fund, Ashmore Emerging Markets Total Return Fund (the “Non-Subadvised Funds”) and Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund (the “Subadvised Funds,” and together with the Non-Subadvised Funds, the “Funds”) and the Sub-Advisory Agreement between AIML and Ashmore EMM, L.L.C, a majority-owned subsidiary of AIML (“Ashmore EMM”) for the management of the Subadvised Funds (each, an “Agreement,” and collectively, the “Agreements”). In determining to approve the continuation of the Agreements for a one-year period, the Trustees considered all factors that it believed, in light of the legal advice furnished to them and their own business judgment, to be relevant to the interests of shareholders, including those listed below.

In evaluating the terms of the Agreements, the Board did not identify any single factor as controlling, and individual members of the Board did not necessarily attribute the same weight or importance to each factor, nor are the items described herein all encompassing of the matters considered by the Board. Throughout their review of the Agreements, the Independent Trustees were assisted by their own Independent Trustee legal counsel. The Independent Trustees had formally requested through their legal counsel, and AIML had provided, certain information the Independent Trustees considered relevant to their evaluation. The Independent Trustees discussed the information over the course of several different occasions, without representatives of AIML present.

Among the information and factors considered by the Board in evaluating the Agreements were the following:

NATURE, QUALITY AND EXTENT OF INVESTMENT MANAGEMENT SERVICES

The Board examined the nature, quality and extent of the services provided by AIML to all of the Funds and by Ashmore EMM to the Subadvised Funds.

AIML’s Services

The Board considered information regarding the overall organization and resources of AIML, including information regarding senior management, portfolio managers and other personnel providing investment management, administrative and other services to the Funds. The Board reviewed AIML’s key personnel who provide investment management services to the Funds, as well as the fact that, under the Agreements, AIML has the authority and responsibility, subject to the Board’s oversight, to make and execute investment decisions for the Funds within the framework of the Funds’ investment policies and restrictions. The Board considered that AIML’s duties include: (i) investment research and selection, (ii) adherence to (and monitoring compliance with) the Funds’ investment policies and restrictions, the 1940 Act and other relevant laws and (iii) supervision of the investment management and other services provided by Ashmore EMM to the Subadvised Funds. The Board also evaluated the significant compliance resources available to and utilized by AIML.

Ashmore EMM's Services to the Subadvised Funds

The Board's consideration of the services provided by Ashmore EMM included a review of its senior management, portfolio managers and other personnel providing investment management services to the Subadvised Funds, its investment philosophy, style and processes, its approach to controlling risk, and the quality and extent of its investment capabilities and resources, including, the nature and extent of research it receives from broker-dealers. In their deliberations with respect to the Subadvised Funds, the Board considered AIML's relationship with Ashmore EMM. The Board also considered Ashmore EMM's breadth and depth of experience and investment results in managing other accounts similar to the Subadvised Funds. The Board reviewed information concerning Ashmore EMM's historical investment results in managing accounts in a manner substantially similar to the Subadvised Funds.

Investment Performance

In considering each Fund's performance, the Board requested and received from AIML data compiled by Lipper Inc. ("Lipper"). The Trustees also received information explaining the methodology for compilation of certain of this information and what it was intended to demonstrate. The Board considered the performance of the Funds in light of their respective investment objectives on a comparable basis relative to the Funds' peers. The Board received performance information for Class A Shares for the one-year period ended December 31, 2012, and for Institutional Class Shares for the one- and two-year periods ended December 31, 2012 for the Ashmore Emerging Markets Corporate Debt Fund, Ashmore Emerging Markets Currency Fund, Ashmore Emerging Markets Local Currency Bond Fund, Ashmore Emerging Markets Sovereign Debt Fund and Ashmore Emerging Markets Total Return Fund. The Board received performance information for Institutional Shares for the one-year period ended December 31, 2012 for the Ashmore Emerging Markets Equity Fund and Ashmore Emerging Markets Small-Cap Equity Fund. In so doing, the Trustees noted the specialized nature and focus of many of the Funds, and for certain Funds the limited number of peer group funds. They also discussed with AIML and considered AIML's views that with respect to several of the Funds, the Lipper peer groups did not account for distinctions that AIML considered to be meaningful for performance comparison purposes. They also noted that the Funds were relatively new, with each Fund having less than a three year track record, and that Ashmore's strategies focus on achieving superior long-term performance over full market cycles. Subject to these points the Board observed that overall, the Funds performed well in comparison to their Lipper peers, with five of the seven Funds performing in the first or second quintile for the one-year period, and only two funds (Ashmore Emerging Markets Sovereign Debt Fund and Ashmore Emerging Markets Equity Fund) performing in the fourth quintile for the one-year period. The Board also took into account AIML's explanation for the comparative underperformance of these two Funds; specifically that each is included in a Lipper peer group with funds that focus on different or less-focused emerging market asset classes which outperformed these Funds' more targeted asset classes during the period. The Board also noted the favorable longer-term track record of AIML and Ashmore EMM in managing accounts having similar strategies as the Funds.

The Board concluded that it was satisfied with the nature, extent and quality of services provided by AIML to each Fund and that there was a reasonable basis on which to conclude that each Fund would continue to benefit from the services provided by AIML. The Board separately concluded that it was satisfied with the nature, extent and quality of services provided to the Subadvised Funds by Ashmore EMM and that there was a reasonable basis on which to conclude that the Subadvised Funds would continue to benefit from the services provided by Ashmore EMM.

ASHMORE FUNDS
ADVISORY AGREEMENT APPROVAL (CONTINUED)

As of April 30, 2013

INVESTMENT MANAGEMENT FEES AND COST OF SERVICES

The Board also considered the contractual and actual investment management fees paid by each Fund to AIML. In doing so, the Board compared the contractual and actual investment management fees and overall gross and net expense ratios (represented by the Funds' Class A and Institutional Class shares) to those of the Funds' peers as determined by Lipper. They noted that most of the Funds were quite small in size relative to their peers. As with the performance comparisons, the Board also noted that, with respect to several of the Funds, there were only a limited number of peer funds with similar investment strategies, and in a number of cases, AIML had discussed with the Board factors indicating the Lipper peer groups included funds that did not account for distinctions AIML considered significant relative to evaluating the breadth and depth of expertise and resources needed to manage such strategies. To the extent the contractual management fees or gross total expense ratios of a Fund were meaningfully above those of the Lipper peers, the Board also considered and took into account AIML's undertaking to continue to waive fees and/or reimburse expenses so as to otherwise limit these Funds' ordinary operating expenses until at least February 28, 2014.

The Trustees also considered the fees paid by AIML to Ashmore EMM in relation to the services provided by Ashmore EMM.

The Board reviewed AIML's costs and profitability as presented by it in serving as investment adviser. The Board noted that AIML was operating at a loss with respect to each Fund except the Ashmore Emerging Markets Total Return Fund, and in that case, AIML's profitability was not excessive.

In evaluating the terms of the Agreements, the Board also considered the other benefits that may inure to AIML and Ashmore EMM as a result of their relationship with the Funds, such as the reputational benefit derived from serving as investment adviser or subadviser to the Funds.

In light of the information provided and the quality of the services rendered and anticipated to be rendered, the Board concluded that the investment management fees to be charged the Funds were reasonable.

ECONOMIES OF SCALE

The Board noted that the contractual investment management fees for the Funds do not contain breakpoints that would reduce the fee rate on assets above specified levels. The Board observed that many of the Funds remained quite small in size, and that the collective assets of all of the Funds had not yet reached \$1 billion. The Board also observed that AIML was subsidizing all of the Funds through fee waivers and expense reimbursements. In evaluating the Funds' contractual investment management fees, the Board considered AIML's representation that the contractual investment management fees were intended to reflect achievable economies of scale and also AIML's continuing agreement to limit certain expenses of each Fund. The Board received and evaluated information concerning whether AIML would realize economies of scale as the Trust's assets grow beyond current levels. The Board noted they intend to monitor each Fund's asset growth in connection with future reviews of the Funds' Agreements to determine whether breakpoints may be appropriate at such time. In light of the Trust's current size and expense structure, the Board concluded that breakpoints in the Funds' contractual investment management fees were not warranted at this time.

The Board concluded that the fees to be paid to AIML by each Fund, and the fees to be paid by AIML to Ashmore EMM with respect to the Subadvised Funds, were reasonable in light of the services to be provided by AIML and Ashmore EMM, respectively, the costs to AIML of operating the Funds, and the Funds' current and reasonably foreseeable asset levels, and determined that the Agreements should, therefore, be approved.

As of April 30, 2013

PORTFOLIO HOLDINGS

The Ashmore Funds file their complete schedule of portfolio holdings with the Securities and Exchange Commission (“SEC”) for the first and third quarters of each fiscal year on Form N-Q. The Funds’ Forms N-Q are available on the SEC’s Web site at www.sec.gov. You may also review and obtain copies at the SEC’s Public Reference Room in Washington D.C. Information about the Public Reference Room may be obtained by calling 800-SEC-0330.

PROXY VOTING

Ashmore Funds’ Proxy Voting Policies and Procedures and each Fund’s portfolio securities voting record for the most recent 12-month period ended June 30 are available upon request and without charge by visiting the Ashmore Funds’ Web site at www.ashmoregroup.com or the SEC’s Web site at www.sec.gov or by calling 866-876-8294.

ASHMORE FUNDS PRIVACY POLICY

We consider customer privacy to be a fundamental aspect of our relationships with shareholders and are committed to maintaining the confidentiality, integrity and security of our current, prospective and former shareholders' personal information. To ensure our shareholders' privacy, we have developed policies that are designed to protect this confidentiality, while allowing shareholders' needs to be served.

Obtaining Personal Information In the course of providing shareholders with products and services, we may obtain non-public personal information about shareholders, which may come from sources such as account applications and other forms, from other written, electronic or verbal correspondence, from shareholder transactions, from a shareholder's brokerage or financial advisory firm, financial adviser or consultant, and/or from information captured on our internet web sites.

Respecting Your Privacy As a matter of policy, we do not disclose any personal or account information provided by shareholders or gathered by us to non-affiliated third parties, except as required for our everyday business purposes, such as to process transactions or service a shareholder's account, or as otherwise permitted by law. As is common in the industry, non-affiliated companies may from time to time be used to provide certain services, such as preparing and mailing prospectuses, reports, account statements and other information, and gathering shareholder proxies. We may also retain non-affiliated financial services providers to market our shares or products and we may enter into joint-marketing arrangements with them and other financial companies. We may also retain marketing and research service firms to conduct research on shareholder satisfaction. These companies may have access to a shareholder's personal and account information, but are permitted to use this information solely to provide the specific service or as otherwise permitted by law. We may also provide a shareholder's personal and account information to their respective brokerage or financial advisory firm, Custodian, and/or to their financial advisor or consultant.

Sharing Information with Third Parties We reserve the right to disclose or report personal information to non-affiliated third parties where we believe in good faith that disclosure is required under law to cooperate with regulators or law enforcement authorities, to protect our rights or property or upon reasonable request by any investee entity in which a shareholder has chosen to invest. Of course, we may also share your information with your consent.

Sharing Information with Affiliates We may share shareholder information with our affiliates in connection with our affiliates' everyday business purposes, such as servicing a shareholder's account, but our affiliates may not use this information to market products and services to you except in conformance with applicable laws or regulations. The information we share includes information about our experiences and transactions with a shareholder and may include, for example, a shareholder's participation in one of the Funds or in other investment programs, a shareholder's ownership of certain types of accounts, or other data about a shareholder's transactions or accounts. Our affiliates, in turn, are not permitted to share shareholder information with non-affiliated entities, except as required or permitted by law.

Procedures to Safeguard Private Information We take seriously the obligation to safeguard shareholder non-public personal information. In addition to this policy, we have also implemented procedures that are designed to restrict access to a shareholder's non-public personal information only to internal personnel who need to know that information in order to provide products or services to such shareholders. In addition, we have physical, electronic, and procedural safeguards in place to guard a shareholder's non-public personal information.

Disposal of Confidential Records We will dispose of records, if any, that are knowingly derived from data received from a consumer reporting agency regarding a shareholder that is an individual in a manner that ensures the confidentiality of the data is maintained. Such records include, among other things, copies of consumer reports and notes of conversations with individuals at consumer reporting agencies.
