Investment Approach

Performance Over a Cycle	Risk Controlled	Importance of Top-Down
Consistent alpha generation	Moderate portfolio risk profile	Risk overlay & performance enhancing
- Target companies that are resilient yet participate in market upcycles. - Valuation discipline and the maximisation of capital allocation made systematic by Stock Rating framework.	- Diversified across Rapid, Mid and Cyclical growers. - All-Cap with relative risk guardrails; primary driver is stock idiosyncratic risk.	- Explicit risk overlay, as well as idea generation. - Macro framed via our Country Scorecard, as well as drawing on Ashmore's depth of expertise across equity, fixed income, and alternatives.

Ashmore Emerging Markets Equity SMA*

The **SMA** targets excess returns by combining direct holdings in **American Depositary Receipts (ADRs)** with a model allocation to an Ashmore managed **Completion Fund**, providing access to EM equities where ADR availability is limited or illiquid while preserving the tax efficiency of directly held securities.

Fig 1: Only ~25% of the index (1,200+) is available via ADRs, biased to certain countries
