

SCHEDULE TO SECTION 2.24 OF THE SUB-FUNDS APPENDIX
Annex II of Regulatory Technical Standards related to the Disclosure Regulation

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Ashmore SICAV Emerging Markets Equity ESG Fund **Legal entity identifier:** 5493005RC0WXXY1B2D63

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

●● Yes	●○ No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ____%	✗ It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

The environmental and social characteristics promoted by the Sub-Fund are 1) the reduction of exposure to certain industry sectors, 2) the exclusion of issuers having low

ESG scores using Ashmore's proprietary ESG scoring criteria and 3) being managed aligned with net zero by 2050. These are each explained in more detail below:

- 1) The Sub-Fund excludes certain industry sectors, as further set out in response to the question "What investment strategy does this financial product follow?" below;
- 2) Application of Ashmore's ESG Scoring Process, which evaluates an issuer's ESG performance against certain ESG criteria, as described further in response to the question "What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?" below; and
- 3) The Sub-Fund falls within the scope of Ashmore Group's commitment under the Net Zero Asset Manager Initiative (NZAMI), meaning that the Sub-Fund will aim to be aligned with the expectations of this framework, which includes portfolio decarbonisation targets.

The Sub-Fund does not have a designated reference benchmark within the meaning of the Disclosure Regulation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The ESG Scoring Process is informed by and based on the following sustainability indicators (as amended from time to time):

Environment
Global climate impact including GHG emissions and net zero targets
Local impact and water and waste management
Incidents of environmental pollution
Energy management and use of green energy
Policies and innovations to limit negative environmental impact
Social
Employee diversity and inclusion
Impact on customers and community
Labour practices including health and safety
Supply chain management including child labour
Materiality of philanthropy spend
Governance
Transparency and disclosure
Governance structure including separation of executive roles
Minority interests fair representation

Public listing and reporting
Management Accessibility

The above sustainability indicators are not each individually scored. Instead, the Investment Manager uses them in their issuer assessment by asking two questions for each of the Environmental (E), Social (S) and Governance (G) aspects:

1. the issuer's *current* level of performance against considered global best ESG practice; and
2. the quality of their policies and initiatives designed to improve their ESG performance.

The issuer is then scored for each of the six questions on a scale of 1 – 5 (very poor to very good). Thus, the combined score for “E” is the addition of two scores, each on a scale of 1-5. Likewise for the combined scores for “S” and “G”.

The Investment Manager invests in issuers that score a combined score of at least 4 according to the ESG Scoring Process on any of the “E”, “S” and “G” combined scores (the “**ESG Scoring Threshold**”). Issuers below this ESG Scoring Threshold are not permissible investments for this Sub-Fund. This is recorded in a dedicated ESG scorecard.

The Investment Manager also considers the following issues when assessing the environmental and social characteristics of the Sub-Fund:

- 1) The factor used to assess the attainment of the successful sector exclusions is ‘exposure to excluded sectors’. Compliance with this factor is maintained on a consistent basis as these exclusions are applied pre-investment and also monitored post-investment on an ongoing basis.
- 2) The factor used to assess the attainment of the ESG score threshold (as outlined above) is the internal issuer-specific ESG scores.
- 3) The factor used to measure the attainment of whether the Sub-Fund is aligned with ‘net zero by 2050’ are the Sub-Fund’s Weighted Average Carbon Intensity (WACI), which should be compliant with the Interim Targets for 2025 and 2030, as well as engagement coverage as per the applied NZAMI methodology.

These factors might change as the approach is reviewed.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

The Investment Manager takes into account the relevant indicators for principal adverse sustainability impacts in the Annex I of the RTS, having regard to their materiality. Such indicators are employed in Ashmore's ESG Scoring Process which considers the relevant principal adverse sustainability impacts on sustainability factors. For more information on the ESG Scoring Process, see below under “What investment strategy does this financial product follow?” and above under “What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?”.

Information on principal adverse sustainability impact indicators will be provided in the periodic reports published for this Sub-Fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The objective of the Sub-Fund is to access the returns available from equities issued by Emerging Markets Corporates, including voting and non-voting common stock, common stock issued to special shareholder classes and preferred stock focussing on issuers satisfying the ESG Criteria (as described below). Such investments, with the exception of cash, bank term deposits, Money Market Instruments and derivatives used for hedging and cash management purposes will constitute 100% of the Sub-Fund's investments. The Sub-Fund may also seek access to returns from related synthetic products of all types and denominated in any currency, including exchange traded funds, depositary receipts, warrants, securities convertible into equity securities, other equity-related investments whose returns vary on the basis of the issuer's profitability (e.g. participation notes).

The ESG Scoring Process and industry sector exclusions are applied at the pre-investment stage, and the scores and application of the exclusions are formally reviewed at least annually.

ESG Scoring Process

The Sub-Fund adopts a responsible investment approach by applying binding ESG criteria to the portfolio (the **"ESG Scoring Process"**).

The Investment Manager issues a score to each issuer, based on their historical and current performance, taking into account the environmental, social or governance aspects that an issuer may present that is drawn from a range of data sources.

Using the framework above, the Investment Manager assesses the quality of the issuer's policies and processes.

The Investment Manager's analysis is based on the disclosures in issuers' policy documents, sustainability reports and through direct engagement with the investee companies. This is complemented by the assessment of analysis provided by third-party data providers as selected at the discretion of the Investment Manager.

Industry sector exclusions

Investments must be in compliance with the Investment Manager's industry exclusion policies. The list of exclusions includes certain industry sectors such as, for this Sub-Fund, fossil fuels and tobacco, and may be amended from time to time by adding other sectors. The exclusion policy including an up to date list of industry exclusions is available on the Investment Manager's website here: <https://www.ashmoregroup.com/en-europe/esg>

The application of the exclusions of certain industry sectors by the Sub-Fund is assessed based on the proportion of the Sub-Fund's investments which breach such exclusionary screenings.

As from 28 May 2025, the following applies:

In addition to the preliminary assessment of investment opportunities against the ESG characteristics described herein, the Investment Manager will monitor the invested positions on an ongoing basis. Should an invested security no longer fulfil or meet the ESG criteria, the Investment Manager may either (i) retain the security or (ii) take appropriate actions (including but not limited to portfolio rebalancing), within a reasonable timeframe that are in the best interest of Shareholders in the Sub-Fund.

If the Investment Manager decides to retain the security or if it cannot be sold due to temporary restrictions (e.g. restructuring or sanctions), the asset will then be automatically reclassified as part of the remaining investments that are not aligned with the Sub-Fund's environmental or social or governance, as applicable.

For the avoidance of doubt, the Sub-Fund excludes investment in issuers in accordance with the PAB Exclusions.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy are:

1. the exclusion of the sectors covered by the Investment Manager's industry exclusion policies as applicable to the Sub-Fund, as further set out in response to the questions "What environmental and/or social characteristics are promoted by this financial product?" and "What investment strategy does this financial product follow?" above; and
2. the exclusion of issuers rated below 4 based on the application of the ESG Scoring Process.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

There is no committed minimum rate to reduce the scope of the investments considered prior to the application of the investment strategy.

- ***What is the policy to assess good governance practices of the investee companies?***

The Investment Manager considers the good governance practices of all issuers as part of its ESG Scoring Process and will not invest in issuers that do not meet the ESG Scoring Threshold (including a combined score of at least 4 for governance as described in more detail above). The Investment Manager assesses good governance of companies on the basis of the following criteria:

- Transparency and disclosure
- Governance structure including separation of executive roles

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- Minority interests fair representation
- Public listing and reporting
- Management accessibility

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

At least 80% of the Sub-Fund's investments exhibit the environmental and/or social characteristics promoted by the Sub-Fund in accordance with the binding elements of its investment strategy (#1 Aligned with E/S characteristics).

Until 27 May 2025, the following applies:

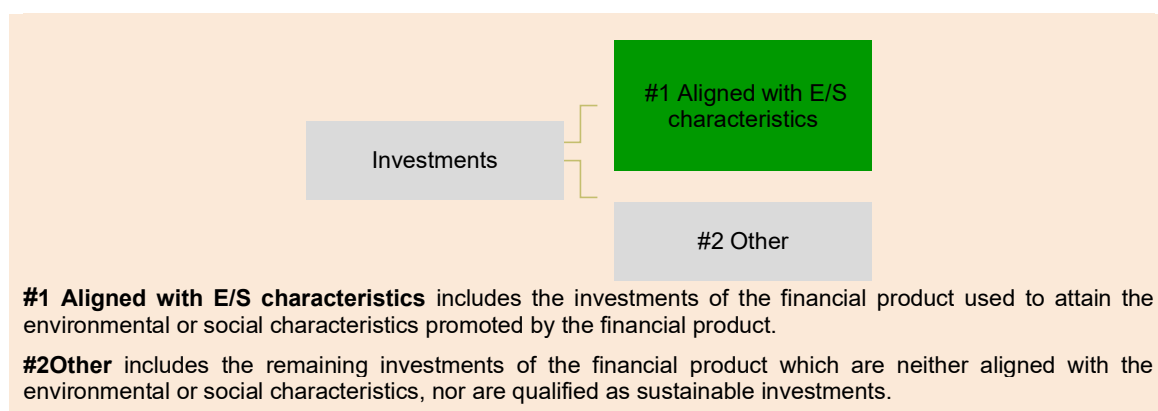

The Sub-Fund is also allowed to invest up to 20% of its NAV in Permitted Bonds, cash and/or hedging instruments (for such hedging instruments calculated using mark to market) under normal market conditions. Such limit may be exceeded, and the Sub-Fund may also invest in bank term deposits in case of unfavourable market conditions or where it is in the best interest of Shareholders, subject to the provisions of the Prospectus. All such assets are excluded from the binding elements of the Sub-Fund's investment strategy for promoting environmental and/or social characteristics (#2 Other).

As from 28 May 2025, the following applies:

The Sub-Fund is also allowed to invest up to 20% of its NAV in Permitted Bonds, cash and/or hedging instruments (for such hedging instruments calculated using mark to market) under normal market conditions. Such limit may be exceeded, and the Sub-Fund may also invest in bank term deposits in case of unfavourable market conditions or where it is in the best interest of Shareholders, subject to the provisions of the Prospectus. These assets also include investments that no longer align with the Sub-Fund's environmental and/or social characteristics but that the Investment Manager has either chosen to retain or is unable to dispose of. All such assets are excluded from the binding elements of the Sub-Fund's investment strategy for promoting environmental and/or social characteristics (#2 Other).

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Sub-Fund may use financial derivative instruments and related synthetic structures. The ESG Scoring Process, ESG Scoring Threshold and industry sector exclusions will be applied to such derivative instruments except for derivatives used for hedging purposes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to invest in any EU Taxonomy aligned investments.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy⁷⁸?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

⁷⁸ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What is the minimum share of investments in transitional and enabling activities?**

The Sub-Fund does not commit to invest in any minimum share of investments in transitional and enabling activities.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Not applicable.

What is the minimum share of socially sustainable investments?

Not applicable.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Until 27 May 2025, the following applies:

The Sub-Fund may, on an ancillary basis, hold cash, may use financial derivative instruments for the purpose of hedging and invest in Permitted Bonds, and may also, in case of unfavourable market conditions or where it is in the best interest of Shareholders, invest in bank term deposits (“Other Assets”). The Other Assets are excluded from the attainment of the environmental and/or social characteristics promoted by the Sub-Fund considering their nature.

As from 28 May 2025, the following applies:

The Sub-Fund may, on an ancillary basis, hold cash, may use financial derivative instruments for the purpose of hedging and invest in Permitted Bonds, and may also, in case of unfavourable market conditions or where it is in the best interest of Shareholders, invest in bank term deposits (“Other Assets”). Other Assets also include investments that no longer align with the environmental and/or social characteristics promoted by the Sub-Fund but that the Investment Manager has either chosen to retain or is unable to dispose of. The Other Assets are excluded from the attainment of the environmental and/or social characteristics promoted by the Sub-Fund.

Furthermore, such Other Assets may be subject to the ESG Scoring Process, ESG Scoring Threshold and industry sector exclusions where appropriate. Other Assets providing an exposure to at least one company are subject to the PAB Exclusions.
