Fund objective and strategy

SICAV SDF is an actively managed open-ended daily dealing UCITS V Luxembourg registered fund. Investments are mainly in transferable debt securities and other instruments issued by Emerging Market Sovereigns and Quasi-Sovereigns denominated in US dollars and other major currencies. While the Fund references the benchmark for the purpose of performance comparison, it can hold components of such in different proportions and can hold assets which are not components of the benchmark.

Performance and exposure disclaimers

1. Past performance (actual or simulated) is not a reliable indicator of future results. Periods greater than one year are annualised, dividends reinvested, index gross. The value of an investment in the Fund may fall as well as rise and investors may not get back the amount originally invested. Changes in rates of exchange between currencies may cause the value of investments to decrease or increase. 2. All performance statistics shown over rolling 3 years (or 1 year where 3 years of data is not yet available). Sharpe ratio assumes the US 3-month T-Bill risk free rate. 3. Duration and Yield statistics include all positions with a verified duration and yield figure, subject to the exclusion of defaulted corporate debt positions. Bond securities with less than 1 year to maturity show yield to maturity on an annualised basis. 4. Theme values have been rebased to 100% based on the theme type of the underlying fund instruments. 5. Currency and country exposures may be reduced by active FX hedging (if applicable). 6. Credit ratings are based on issuers with a rating, figures provided are based on the middle of the three rating agencies S&P, Moody's and Fitch. If only two of the ratings are available then the lower rating of the two will be used. Percentages gross to 100%, where applicable. 7. Top 10 holdings do not include derivatives apart from total return swaps and p-notes. 8. For investments in Ashmore managed funds (where applicable), allocation and holdings information is shown on a "look through" basis, whereas attribution information is not shown on a look through basis. 9. Hedged benchmarks are used where applicable. 10. Attribution is reported Gross and shown in USD terms unless otherwise stated. 11. Ongoing Charges Figure (OCF) as at 30.06.2025. 12. A dash (-) represents zero holding. 0.0 and 0.00 represents a fractional holding. 13. Ashmore's Fund yield to maturity (YTM) (for hedged classes this is in USD) calculation applies a yield for defaulted sovereign and quasi-sovereign securities, in line with index provider treatment. This can inflate the Fund and index yield to maturity given this assumes a full repayment at par. Defaulted corporate debt positions have their yield set to zero. Additionally, please note that Ashmore's reported YTM for fund and index are calculated on a 'weighted average security yield' basis per market convention, whereas the JP Morgan Index Monitor calculates YTM using the IRR of the underlying index security cashflows. ## Ashmore SICAV Emerging Markets Sovereign Debt Fund (SICAV SDF)

Share class: USD Inst

**Risk Warning:** Investors should consider certain risk factors peculiar to investing in Emerging Markets, before taking any investment decision. Emerging Markets (EM) carry risks as well as rewards. These require consideration of matters not usually associated with investing in securities of issuers or financial derivative instruments linked to securities of issuers in the Developed Markets. The economic and political conditions differ from those in Developed Markets, and may offer less social, political and economic stability. EM may be more volatile than more mature markets. The value of your investment could go down as well as up. In extreme circumstances, this could result in a total loss of your investment. EM may suffer from liquidity problems; changes in rates of exchange between currencies may cause the value of your investment to decrease or increase; operational risks of investing are higher than in more developed markets. For a full description of these and further risks, you should refer to the latest Prospectus.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3-year, 5-year, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating or 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. The Morningstar Rating is for the share class specified only; ratings for the other share classes will vary.

\*Month in arrear as of 31.10.2025, the Ashmore SICAV Emerging Markets Sovereign Debt Fund (SICAV SDF) USD Inst in the Global Emerging Markets Bond category received a rating of 5 stars among 1505 funds for the 3-year period and 4 stars among 1283 funds for the 5-year period and 3 stars among 603 funds for the 10-year period, based on risk-adjusted returns. **Past performance is no guarantee of future results.**
